About SpeckyFox

Experience

SpeckyFox is a Software Development and QA company with more than 4 years of experience in the market

Services

We offer end-to-end development and testing services, ranging from strategic consulting to design, development, testing, and implementation services that are aimed to facilitate faster time to market and enhanced operational efficiencies

Clients

We work for startups , mid size and large conglomerates in their projects demanding leading edge software development, testing and automation skills around web based , ERP, mobility and open source technologies
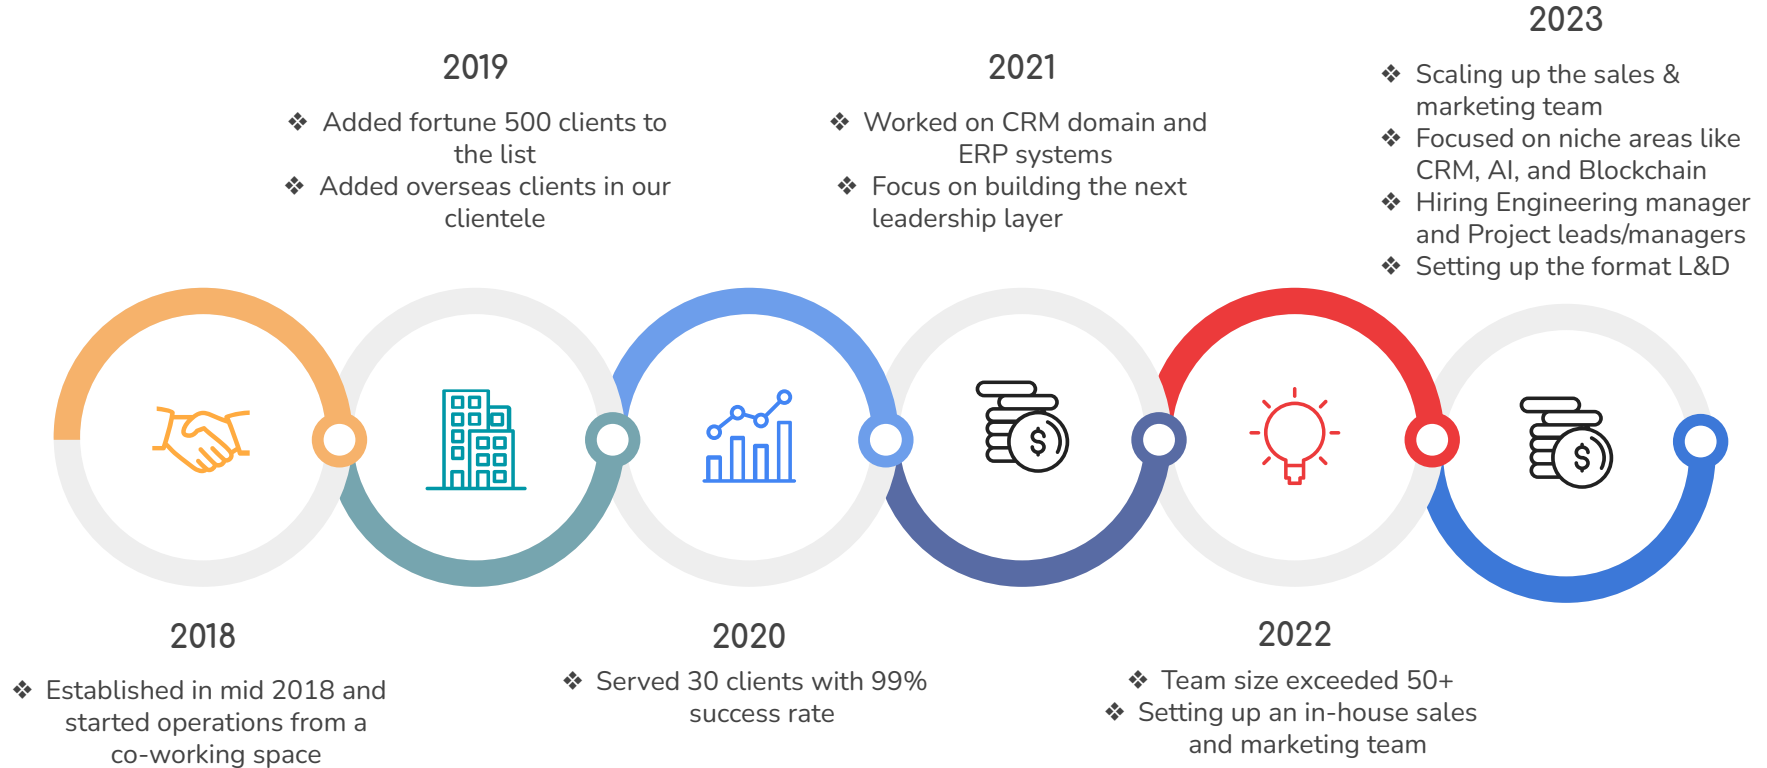

Pricing models

We have an extensive experience in all types of models viz fixed price, resourcing, managed services and T&M

Team

We are passionate about building great products and doing successful projects that make people's lives easier. We are a team of young people with diverse experience in Software Development, Design and Testing

Our Journey

2018
- Established in mid 2018 and started operations from a co-working space

2019
- Added fortune 500 clients to the list
- Added overseas clients in our clientele

2020
- Served 30 clients with 99% success rate

2021
- Worked on CRM domain and ERP systems
- Focus on building the next leadership layer

2022
- Team size exceeded 50+
- Setting up an in-house sales and marketing team

2023
- Scaling up the sales & marketing team
- Focused on niche areas like CRM, AI, and Blockchain
- Hiring Engineering manager and Project leads/managers
- Setting up the format L&D

QA Competencies

Manual Testing

- ❖ Ensures the maximum test coverage
- ❖ Thrive for zero defect release
- ❖ Cross-browser, cross-device testing

Automation Testing

- ❖ Expertise in Web, API and Mobile Automation
- ❖ Ability to create and work with different frameworks
- ❖ Expertise in continuous automation techniques
- ❖ Ensures the maximum code coverage

API Testing

- ❖ Capable to test the APIs to ensure the robust application core
- ❖ Ability to inspect and assign the defect to the right person

Performance Testing

- ❖ Expertise in identifying the bottlenecks
- ❖ Infrastructure Testing
- ❖ Suggestion for the application performance improvement

Security Testing

- ❖ Automatic + Manual testing to ensure no vulnerability is left uncovered
- ❖ Experienced in GDPR Implementation

QA Consulting

- ❖ Implementing the QA processes
- ❖ Optimizing QA processes
- ❖ Helps in QA Audits

Domain

eCommerce

- Helped various renowned brands
- Strong domain knowledge in B2B and B2C selling applications

CRM

- Strong expertise in Salesforce testing
- Helping the clients in Manual and Automation testing of salesforce applications

A/B Testing

- Collaborated with the client in end to end testing the A/B testing process.
- Also, helping their users to ramp up on the product

Crypto Trading

- Automated the crypto order flow
- Enabled synthetic monitoring using automation scripts

Domain

Energy

- ❖ Helped one the big Australian clients in QA of their desktop application. This client provides efficient energy plans to their customers

Social Media

- ❖ Good expertise in testing the social media platforms
- ❖ Provided manual and automation performance testing services

Mortgage

- ❖ Client develops the application that is used for finance, refinance, mortgage and paperwork
- ❖ Helped in manual, automation & performance testing

Retail

- ❖ Client provides hygiene and audit services to their customers. SpeckyFox helped to automate the end to end audit process by developing mobile app and website

Testimonials

Founder of digital startup (AutoOptimize), Canada

I've been working with SpeckyFox for a year and these guys are like family. They care for my project as if it were their own. Their attention to detail, promptness with communication and work ethic is second to none. Will be working with them for a long time to come

QA Lead of Leading eCommerce Company

It was pleasure working with you, I second to Santosh for each and everything he mentioned, being the latest entry in the project you caught up things very quickly and start working as a core QA member. you made things super easy for the team as you shared the workload and help team members even in the odd hours. Will like to work with you again if possible, in future. Till then all the very best for your future projects and continue with your brilliant work.

QA Lead of Hair & Skin Care eCommerce brand

Thank you all for the wonderful work and all the support in making this project success.
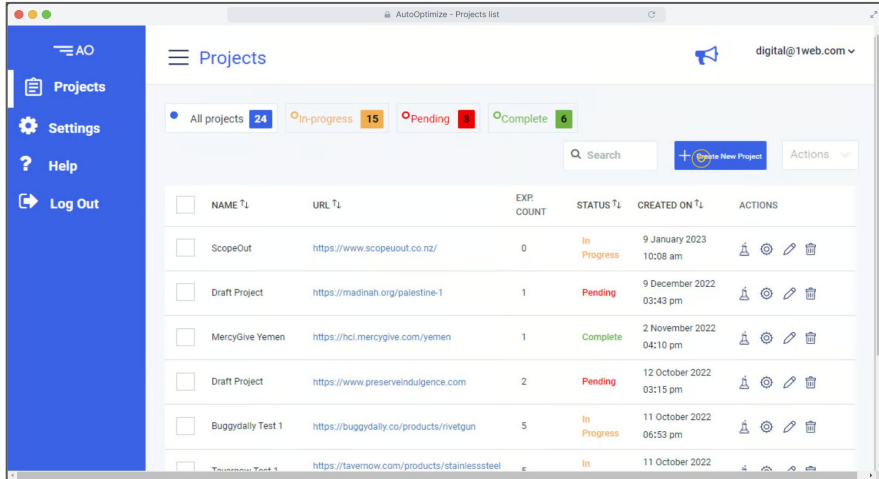

Thanks Raj for understanding the requirement and able to support both promos and Price upgrade project and also production support for CA/US

**Account Manager of a big services based MNC**

Thank you SpeckyFox and Kamini for providing continuous support and dedication at work

Portfolio

AutoOptimize

AutoOptimize provides you with high-performing templated A/B tests that have been proven to increase conversion rate up to 30% within 90 days. It's NOT just an A/B Testing Tool. It's a SHORTCUT

Mortgage Applications

Customizable Title & Escrow Software. The title company insures the property's title with policies to the buyer and the lender. Escrow is the arrangement of one company holding and managing the payment of funds required for two parties.

Portfolio
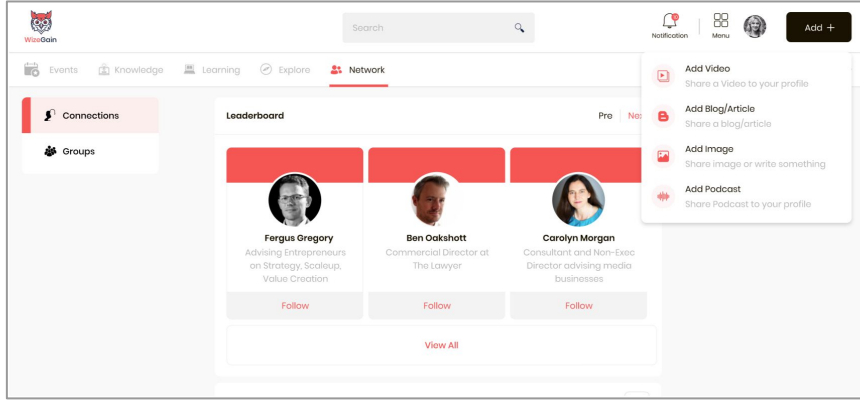

WizeGain

The client has a business established in multiple nations providing event organization, social collaboration, meetups and event management.
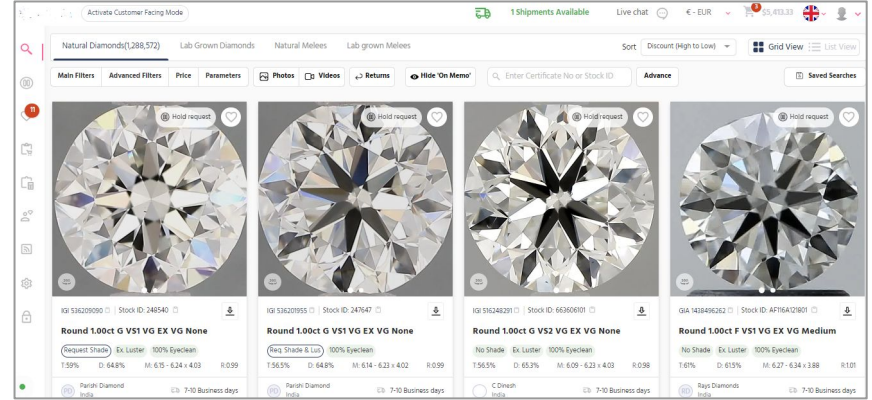

Nivoda

Nivoda provides jewellery businesses with a simple solution to strengthen profits, increase efficiency and accelerate growth with its B2B diamond marketplace. Designed to save you time and money whilst giving you access to the world's diamond supply at the best prices with zero inventory risk, Nivoda is trusted by thousands of retailers all over the globe.

Testing Processes
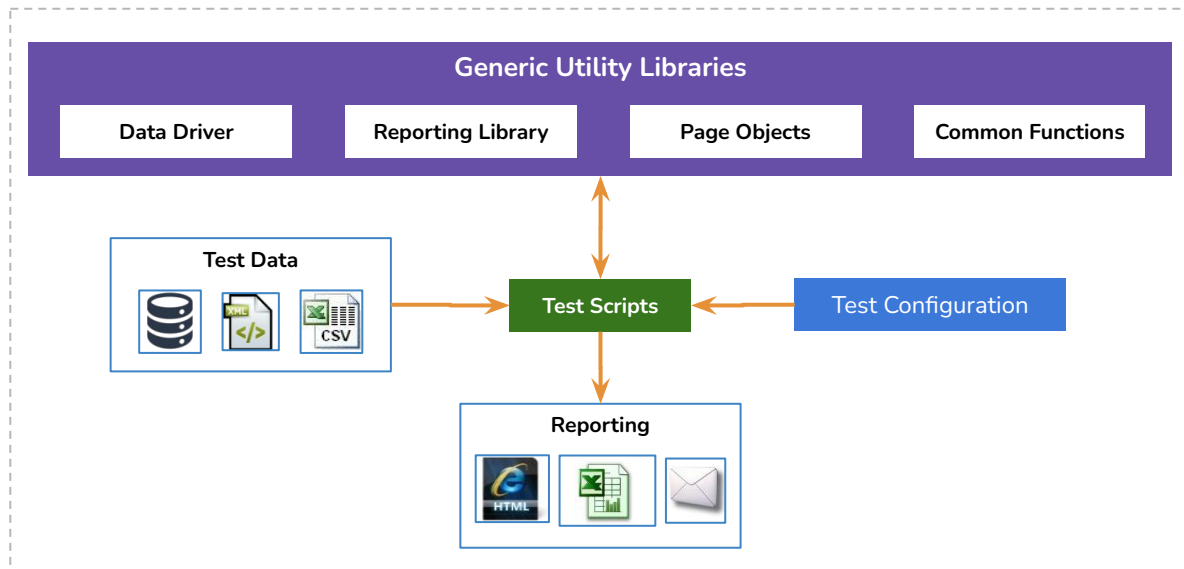

End to End Functional Testing Overview

Business Apps

ORACLE® E-BUSINESS SUITE

SAP

Microsoft Dynamics
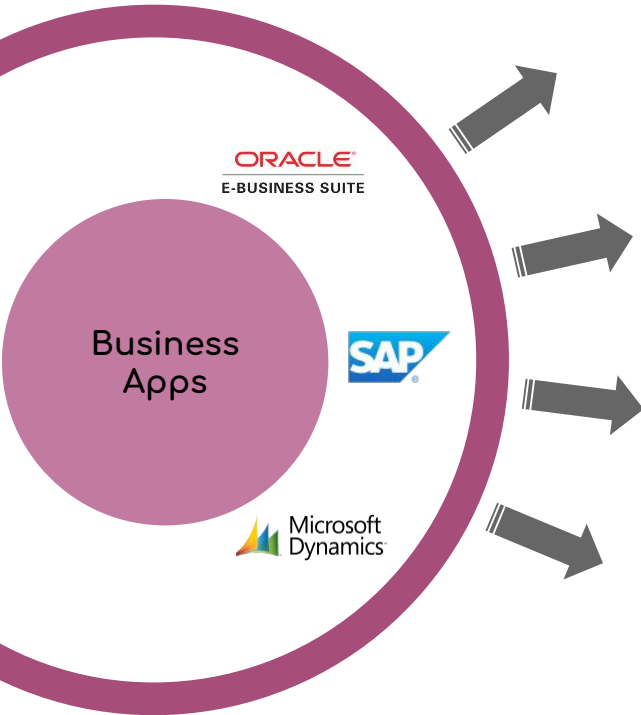

Lifecycle Verification & Validation	End-to-End QA includes Business Flow Mapping, Data preparation & Validation during or post implementation
Feature Testing	Perform feature (Pre and Post) analysis and verify functional / technical upgrade
Patch Testing	Verify impact on patch updates and perform regression testing
System Integration Testing	Complete system testing of all the components and testing on cross devices
Maintenance Testing	Perform continuous regression for ongoing releases and maintenance
Rollout Testing	Functional test creation, test execution, and test run documentation, cutting SAP rollout testing

Test Accelerators

❖ Domain and Functional Knowledge

❖ End to end Automation framework for front end, middle tier and backend validations

❖ Customized Test Reports

❖ Best Practices, Framework s & Methodologies

Test Automation Framework

Generic Utility Libraries

| Data Driver | Reporting Library | Page Objects | Common Functions |

Test Data

Test Scripts

Test Configuration

**Reporting**

Key Features

❖ Technology Independent

❖ Custom reporting

❖ Screenshots captured for all the failure cases for easy debugging

❖ Reusable components

❖ Scalable and easily maintainable

Performance Testing Approach

| Performance Test Planning | Automated User Script Creation | Scenario Execution & Monitoring | Performance Analysis & Recommendation | End |

Identify Performance requirement and scenarios

— Performance Requirements →

— Projected Metrics →

Performance Testing Environment Setup

— Scripting of workflows →

← Re-scripting of workflows —

Testing under controlled environment

— Raw Performance Data →

Test Result Analysis

— Meet SLA →

CERTIFIED

— Recommendation for Perf Tuning ↓

Performance Tuning

— System Or Process Changes ↑

Deliverables

❖ Performance Test Plan ❖ Performance Goal, Acceptance Criteria ❖ Scenarios & SLA ❖ Determining the workload	❖ Environment Setup ❖ Performance Scripts ❖ Performance Data Creation	❖ Test Progress Report ❖ Issue Log & Incident Report ❖ Measure overall resource usage	❖ Test Completion Report ❖ Observation and Recommendations ❖ Determine future processing requirements

Shift Left Approach

Requirements → Architecture & Design → Development → Testing → UAT → Release

Outcome

- ❖ Bug fixing cost reduces
- ❖ More confidence at the time of release
- ❖ Better understanding between the teams
- ❖ Early risk identification

Shift Left Enablers

- ❖ Early engagement of the team
- ❖ Involve the appropriate testing team at the right time.
- ❖ Posses good domain knowledge

Dev Competencies

Website Development

❖ Ensures intuitive UI of the application
❖ Responsive UI with seamless user experience
❖ Cross-browser and cross-device UI compatibility

Mobile Development

❖ Native mobile development
❖ Optimized code to ensure low power usage
❖ Ensures intuitive UI of the application
❖ Continuous monitoring and improvements

Microservices & API Development

❖ Building scalable applications
❖ Developing de-coupled and loosely coupled services
❖ API first development

Middleware Development

❖ Developing middleware applications
❖ Ensuring seamless flow of data between the systems
❖ Using robust processes

Dev Consultation

❖ Optimizing Development processes
❖ Helps to define and implement robust development strategy
