EXPERIENCE

Software developer

Redian software company

📅 02/2023-Present 📍 Noida, uttar pradesh

- Achievements/Tasks
- Developed and maintained server-side applications using Node.js and Express.js or MongoDB. Designed RESTful APIs and implemented them for seamless client-server communication
- Built and maintained RESTful APIs for user registration and login, implementing secure and efficient authentication and authorization mechanisms
- Developed user registration and authentication workflows, including email confirmation and password reset features
- Collaborated with front-end developers to create interactive web applications using React.js. Integrated and maintained databases, ensuring data security and user-friendly experiences. Implemented JWT (JSON Web Tokens) for secure user authentication and authorization, protecting sensitive data and resources

Projects

Drive Hub, job Portal

📅 02/2023-Present

- Driver Management System: Developing a backend system for a Driver Hub application and used react.js for front-end and integrating apis.
- Data Storage and Integration: Implementing a robust data storage solution to securely store and
- Business Logic and Workflow. This includes defining rules and processes for driver onboarding, verifying driver credentials, managing driver availability and schedules, and facilitating driver customer matching for services like ride-sharing or deliveries

Designing and implementing core business logic and workflow

📅 Date Period - 02/2023

- Designing and implementing the core business logic and workflow project involves creating APIs and services that enable the management of driver-related data, such as driver profiles, contact information, availability, and performance metrics
- Manage all the integrating apis from front end side using react.js, vue.js

Internship

Ducat

📅 07/2022 - 02/2023

- I have worked on the E-commerce websites, Tech Used
- Bootstrap,,react.js from frontend and Node.js with backend
- This may involve utilizing a database system like MongoDB to store all product profiles and integrating with external systems or APIs to fetch additional relevant data. I have also made food app using these.

EDUCATION

B.TECH Computer Science

Regional college for education research and technology

📅 07/2018 - 06/2022 📍 Jaipur

SUMMARY

I am a highly motivated and skilled software developer with 2 years of professional experience in building and maintaining server-side applications. Proficient in JavaScript and experienced with frameworks such as Express.js. Demonstrated expertise in developing RESTful APIs, integrating third-party services, and ensuring high performance and responsiveness of applications.

SKILLS

Node.js	js	css	socket	bootstrap
Html	python	Git	Javascript	
Json	Jwt	MongoDB	Express.js	
vue js	Oops	React.js	Rest API	
Razorpay	tailwind	Sql		

Hobbies

☐ Meditation

☐ Reading books

☐ Workout
