OBJECTIVE

I am a Frontend Developer with almost three 3 years of experience working with these frontend technologies HTML, CSS, Javascript, React, and NextJs to deliver exceptional customer experiences. Adept at contributing to a highly collaborative work environment, finding solutions, determining customer satisfaction, and trying to give the best user experience to end users I also worked in the SEO field and handled the core web vitals of web pages, maintaining their ads slots for reachability and performance of page.

WORK EXPERIENCE

Frontend Developer

Coffeebeans Consulting LLP   2021-present

- Working as a frontend developer using ReactJs, and NextJs frameworks for building user interfaces, and also worked on different types of CSS frameworks for styling the components like material UI, styled component, and tailwind.

- Worked for different types of industries like news media, logistics, and in-house projects for building web applications and mobile applications. Also care about page responsiveness and core web vitals metrics like LPC, CLS and FID.

- Talking to clients and their vendors to understand their business logic and requirements then implementing those in the frontend codebase and deploying the changes after testing on the production based on sprint planning and priority

PROJECTS

SAKAL MEDIA PVT LTD (PUNE) :
In this project working as a frontend developer using ReactJs, NextJs, Styled Components, and other npm packages for building the new page using functional components. Worked on core web vital to maintaining the page performance and load time and also worked on ads restricting and adding different types of vendors ad script for better reachability and ads performance to maximise revenue.

ISCP IBS PVT LTD :
In this project worked as a frontend developer using ReactJs, Styled Components, React native, and TypeScript for building the page using functional components like an admin dashboard to track the records of transportation details. And worked on React Native to build mobile applications for different types of users who can use email login, apps for drivers like first-mile last-mile, and warehouse users.

WRU WIDGET :
In this project worked as a frontend developer using ReactJs, Material UI, and amp for building the admin page for subscription tracking purposes using the material UI table and modals components and the Wru widget is a recommendations widget that is used by published domains like news media and blogger sites. Wru widget is a horizontally scrollable widget used for user engagement on websites.

REWARD APP AND OFFICIAL WEBSITE :
In this project worked as a frontend developer using ReactJs, NextJs, and CSS modules Saas for building and revamping the pages of the website which is fully responsive on all types of devices.
