

AMIT CHAURASIA

Full Stack Web Developer

Professional Summary

A highly organized and hard-working individual looking for a responsible position to gain practical experience. and I can utilize my skills for developing my career and for the growth of the organization.

Projects

A NEXFLIX CLONE April 2024

In this project, I have cloned the popular streaming platform, Netflix, using HTML5 and CSS3. It aims to recreate the core functionalities and layout of Netflix's user interface.

Features:

- Homepage.
- User Authentication.
- Product Listings.
- Checkout Process.
- User Profiles.

Netflix's website for reference.

Tech Stack: HTML5 and CSS3 tutorials and documentation.

E-SHOPPING March 2024

Developed and deployed a dynamic e-commerce web application using React.js, contributing to a seamless online shopping experience for users.

Features:

- Homepage.
- User Authentication.
- Product Listings.
- Checkout Process.
- User Profiles.
- Privacy Policy
- Contact Us
- Shipping Information
- Returns & Exchange

Tech Stack:- React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Material-UI, RESTful APIs, Git/GitHub.

NEWS APP Dec 2023

In this project there are some news which are on the screen and if a user wants to know more about a particular news then he can select that news and get the details. A web-based platform has been developed to publish and consume news articles in various categories..

Features:

- Homepage.
- Article Pages.
- Categories.
- Multilingual Support
- Create UI components for the homepage, article pages, and user authentication.

Tech Stack:- HTML, CSS, JavaScript. Framework (React.JS, Bootstrap)

COUNTRY DETAILS WEBSITE Nov 2023

Created a basic HTML document with the necessary structure, including a search bar, a container to display the search details, and placeholders for the country details you want to display, to fetch data from the API when the user submits a search query. JavaScript is used.

Features:

- Homepage.
- Country Listing Page.
- Country Details Page.
- API Integration.
- Maps API for displaying interactive maps (Google Maps API)

Tech Stack: HTML, CSS, JavaScript
