WORK EXPERIENCE

Jethi Tech Solution

Jaipur, Rajasthan

Frontend Developer Inter (Remote)

19 May, 2023- Present

- Proficient in developing interactive web applications using **ReactJS** and styling with **Tailwind CSS**, Experienced in implementing modern design principles through **Material UI** for consistent user interfaces.
- Demonstrated ability to integrate **APIs** and **GraphQL** for enhanced application functionality. Actively engaged in code reviews and maintained code quality via continuous integration.
- **StockChamp**: Contributing to the development of an application for gaming and earning 
- **INRE**: Developing an online land acquisition platform enabling users to explore, select, and assign a company employee (pilot) to visit and record land sites. Facilitated payment processing for access to site information.
- **Barbera**: Worked on an innovative platform to connect users with barbers and salons.

Suven Consultant and Technology Pvt Ltd

Mumbai, Maharashtra

Web Developer Intern (Remote)

04 May, 2022 – 18 May, 2022

- I've created four frontend websites inspired by well-known platforms like Hotstar, Medium, and animation sites. These sites, named 365 Entertainment, Blogging, CSS3 Animation, and Voter Registration, were built using **HTML**, **CSS3**, and modern **JavaScript**.

PROJECTS

Software Piracy Protection System – ReactJs, CSS, NodeJs, ExpressJs MongoDB, PostMan

[Github](#) | [Live](#)

Sep 2022 – Mar 2023

- Our team's final year project is centered around countering software piracy. We've implemented Mac address authentication to verify users based on their product key. Following successful key verification, an additional layer of internal Mac address verification takes place. To facilitate this, we've created two websites: one for software purchases and another for seamless activation.

Reminder App – ReactJs, CSS, NodeJs, ExpressJs MongoDB, PostMan, Twilio

[Github](#) | [Live](#)

May 2023 – May 2023

- This reminder app are building aims to help users set reminders for important tasks or events, and get notified when the time due. One unique aspect of this app is that it leverages WhatsApp to send notifications to users when their reminders are due. it also allows users to add a title and description to their reminders, which can help them better identify the task or event associated with each reminder.

WhatsApp Clone – ReactJs, CSS, NodeJs, ExpressJs MongoDB, Google Auth

[Github](#) | [Live](#)

July 2023 – Aug 2023

- I created a WhatsApp clone using ReactJS, Node.js, Express.js, and MongoDB. The clone features real-time chat, file sharing, and secure Google authentication. This project strengthened my development skills and demonstrated my ability to integrate diverse technologies for seamless user experiences.

EDUCATION

Rajkiya Engineering College Banda

Banda, Uttar Pradesh

B.Tech in Information Technology (CGPA – 7.75)

Graduation Date: 30 June 2023

TRAINING COURSES

ReactJs (Basic to Advance) by GeeksforGeeks

Project Management by Microsoft and LinkedIn

C++ by Udemy

Bootstrap and JQuery by Udemy

SKILLS

C, C++, HTML, CSS, JavaScript, ReactJs, NextJs, ExpressJs, GraphQL, MongoDB, Firebase, Git, Tailwind Css, Material UI, Ant Design, Rest Api, Docker
