EXPERIENCE

Tech Mahindra

Associate Software Engineer

March 2024 - Present, Bengaluru,
Karnataka

Generative AI Powered Email amplifAIer

- Developing Java services for the Generative AI Powered Email amplifAIer, part of Tech Mahindras TechM amplifAI0 suite of AI offerings.
- Implementing backend services using Java to support generative AI capabilities, providing unified visualization and automation techniques.

Incture Technologies Pvt Ltd

Associate Software Engineer

Jan 2022 - Dec 2023, Bhubaneswar,
Orissa

ELC-Customer Success Platform Development

- Developed a comprehensive customer success platform to track purchases, sales, and returns, and to generate analytical reports for business performance on a monthly, quarterly, half-yearly, and yearly basis.
- Introduced a task-tracking feature to streamline approval processes, providing visibility into task statuses using my knowledge of SAP BTP suite features like Business rules, Workflow Management and Hana.
- Managed production bugs, ensuring quick resolution to minimize downtime along with the addition of new functionalities based on client requirements to enhance user experience and meet business needs while ensuring code was robust, with no loose ends, through thorough code reviews, testing and continuous integration and Deployment using CLI.
- Received "Excellence Award" from ELC for my success on the project.

Onboarding

- Designed and created a customizable workflow for onboarding processes.
- Implemented Keycloak OAuth 2.0 for secure, one-time login. Used tokens for role-based access control (RBAC) in the Spring Framework.
- Built the application on Spring Framework for robust backend functionality.

Bentley

- Joined the Support team to help in creating a manual task process that got stuck by application failure. Debugging and creating fixes in existing applications for going live.
- Provided implementation of SuccessFactors APIs in main code for authentication and authorization.

SUMMARY

Dedicated and results-driven Java Full-Stack Developer with a proven track record of designing and implementing complex software solutions. Adept at collaborating with cross-functional teams to drive project success. Seeking a challenging position to leverage my technical skills, problem-solving abilities, and commitment to excellence in software development.

SKILLS

Back End	Java, Python
Front End	ReactJs, JavaScript,HTML, CSS,
DBMS	MySQL, Oracle SQL, PostgreSQL, HANA
OS	Windows, Linux
DevOps	Docker, GitHub, Kubernetes
Framework	SpringBoot
Soft Skills	Unit Testing(JUnit Mockito), SAP BTP, Microsoft Azure, AWS

EDUCATION

Birla Institute of
Technology

Mesra, JH

Bachelor of Technology - Information Technology

GPA: 7.27/10.00

PROJECTS

Smart-shop

- Order service: Manages customer orders, interacts synchronously with Inventory Service to check product availability.
- Notification service: Sends asynchronous notifications to customers about order status changes, triggered by events from order services.
- Technologies used: Spring, mongoDB, Mysql, kafka, Resilience4J, Kibana, Eureka.
