About Me

Fresh software engineering graduate with a Bachelor's degree, eager to embark on a dynamic and challenging development role. Committed to acquiring practical knowledge and hands-on skills, I am driven to make meaningful contributions to projects and collaborate effectively within teams. Enthusiastic about continuous learning and personal growth within a professional setting.

My Project

Ecommerce Website

June 2022 - July 2022

Key responsibilities:

- Proficiently orchestrated the end to end sales cycle for a dynamic e-commerce platform specializing in premium branded merchandise.
- Encompassing order acquisition, secure online payment processing, meticulous capture of delivery particulars, streamlined order fulfillment, and prompt customer delivery.

Food ordering Website (FoodCrave)

July 2022 - August 2022

Key responsibilities:

- FoodCrave seamlessly connects customers with their favorite restaurants. Leveraging an intuitive website interface, FoodCrave streamlines the ordering process by allowing customers to place their orders online, which can be conveniently paid for through both online transactions and cash on delivery.

Weather App

Jan 2023 - Feb 2023

Key responsibilities:

- Utilizing a modern tech stack to create an efficient and responsive web application. Leveraging HTML and CSS for the frontend.
- In backend, I harnessed the power of Node.js and integrated weather APIs, enabling real-time weather data retrieval and processing.
