PROFESSIONAL SUMMARY

Aspiring web developer with over two years of front-end development and database management experience, seeking to take the next step in my career. With a proven track record of building responsive and visually appealing websites and applications implementing technologies like React, Next.js, Astro, I am committed to leveraging my existing skills and acquiring new ones to create cutting-edge solutions that meet the needs of users and clients alike.

KEY SKILLS

- | | | | | |
|-----------|--------------|---------------|-------------|-----------|
| • React | • HTML | • TailwindCSS | • Git | • SQL |
| • Next.js | • CSS | • Bootstrap | • Bitbucket | • MongoDB |
| • Astro | • Javascript | • Ant Design | • Node.js | • Express |
-

WORK EXPERIENCE

Senpipper Technologies

Apr '22 - Dec '22

Web Developer

- Built a fully responsive, new website for the company using Astro, and Tailwind CSS, with over 20 pages, in a period of 2 months. Researched the technologies required, and delivered a pixel-perfect website.
- Delivered new features, like notifications setup, form transfer, markup field creation, utilizing React, Redux, Ant Design, and other related libraries to implement high-quality solutions, directly impacting over 10 client instances.
- Implemented a new version tracking functionality, enabling users to revert to older versions of product forms, with infinite scroll, lazy loading, and memoization for improved performance.
- Created printer-friendly production ready stickers for product tracking, increasing the production capacity by 100%.

Cognizant

Jul '20 - Nov '21

Programmer Analyst

- Processed and resolved user queries under defined SLAs of 24-48 hours, providing prompt resolutions for 10-20 issues per day, for an internal Customer Relationship Management app developed for a renowned publishing firm.
 - Performed updates and changes to the database as per requests, ensuring data purity and structure.
 - Participated in the development and improvement of new, as well as existing front-end components and features, utilizing the Ant Design UI library for React, as well as styled components.
 - Underwent full stack development training on HTML/CSS, JavaScript, React, ASP .NET, Entity, C# and MySQL.
-
