PROJECTS

MAZDA USA Feb 2023 - Present

- Website Development and Enhancement: updating their official website to provide information about their vehicle models, features, promotions, dealer locators, and online vehicle configuration and purchasing options.
Online Vehicle Management: Implemented a system for managing vehicle inventories, allowing customers to search for available vehicles, check specifications, schedule test drives, and request quotes.

SUBEEZ Nov 2021 - Mar 2023

- Subeez by Simpro is a web application developed to streamline and simplify subscription management for businesses. It provides a user-friendly interface for businesses to manage their subscriptions, track customer data, and automate billing processes.

PEOPLE TRACKER Sep 2021 - May 2022

- The People Tracker project is a web application developed using React.js that enables users to track and manage information about individuals. It provides a user-friendly interface for adding, searching, and updating data related to people, such as their personal details, contact information, and activities.
