Tools: Git, GitHub, Postman

Projects

BookQuest | *MERN Stack* | [Live](#)

- Developed a dynamic e-book reading e-commerce web application using the MERN stack with filtering, sorting, rating and review and user interaction features for enhanced user experience.
- Streamlined content management and sales tracking for efficient administration.
- Admin dashboard for efficient management. Add, update, and delete books and categories for content management.

UserConnect | *MERN Stack* | [Code](#)

- Developed a dynamic web application using **MongoDB, Express.js, React.js, Node.js** from scratch.
- Implemented user authentication and authorization using **JSON Web Tokens (JWT)** to ensure secure user access.
- Designed and implemented secure user registration, login, and profile management features.

FoodHub | *React JS* | [Code](#) [Live](#)

- Developed a responsive React website for searching food recipes by name, providing a user-friendly culinary experience.
- Designed and developed using **HTML, CSS, ReactJs, React-router**. Used **MealDB API** to fetch and display detailed recipes, enriching the user's cooking journey with a wide variety of culinary options.
- Implemented a dynamic theme-changing feature using React Hooks, allowing users to personalize the app's appearance according to their preferences.

Achievements

- Max 4115/27000+ rating in Leetcode Weekly coding challenge
- 5 Star in **problem solving** at HackerRank
- 5 Star in **C++** at HackerRank
