EXPERIENCE

Software Engineer

Software Ag - Software AG is an enterprise software & technology company with an industry-leading suite of products and solutions in API management

📅 May 2022 (Currently Working)

- Working with the Cloud stream team, helping to develop and test connectors for various back-ends. Some of the latest connectors that were worked on and tested include Jira, Oracle, Amazon, and Salesforce.
- Responsible for delivering UI automation code and also tests various products using the integrated software of the organization, as well as the webMethods.io platform.

Front-End Developer Intern

Growth Gear - GrowthGear is a digital product incubator that develops delightful experiences across web and mobile, leveraging expertise in rapid UI/UX design

📅 January 2022 – March 2022

- Worked as a front-end developer intern and contributed to live client projects and was responsible for developing a product using React JS for a client project.
- Completed and delivered the product on time, received very positive feedback on its implementation and enhanced the efficiency and user experience of the website, lead the technical design, and took responsibility for technical delivery.

Front-End Developer Intern

Finmo - Finmo is a fintech platform that focuses on providing online payment processing and payment gateway

📅 October 2021 – December 2021

- Worked with the front-end team to develop important components using React JS, JavaScript, and other technologies for the product. As part of the product release in Australia, revamped the UI of the product for Australian customers.
- Responsible for developing an API for one of the modules of the product.

Front-End Developer Intern

Phurti Instant Grocery - Phurti is an AI-Enabled Instant Grocery Start-up operating in Bangalore.

📅 September 2021 – October 2021

- Was responsible for brainstorming, developing the UI part, and adding functionalities that eased UX. Integrated additional features into the existing product, resulting in a smoother user experience both during and after the changes. As a result, the product metrics improved and the company received excellent feedback from customers.
- Responsible for assisting the back-end developer by providing requirements from the front-end side and integrating the front-end part of the website with the back-end.
