## SKILLS & TOOLS

React JS   Redux   Next JS   HTML   CSS

JavaScript   TypeScript   Unit Testing   Github

Bitbucket   GitLab   Postman   Vue JS

MySQL   JIRA   Node JS

## PROJECTS

### Deal Pricing

- This Project is build using React js, JavaScript, HTML, CSS and Material UI.
- The Deal Pricing Web App will help us to streamline the critical process of finalizing the TCV (Total Contract Value) and Project Margin% for any deal in the proposal stage.
- This will provide a platform for better clarity, transparency and collaboration between the Sales, Solution and Delivery Team.

### CSAT & NPS Management

- This Project is build using React JS, JavaScript, HTML, CSS and Material UI.
- Managed end to end process of gathering and analyzing client feedback, including customers satisfaction and net promoter score of all clients of the company.
- Streamlined feedback collection process, analyzed results and provided actionable insights to management team to ensure customer satisfaction and drive business growth.

### Aeries Software

- This Project is Build using React JS, JavaScript, HTML, CSS, Material UI.
- Aeries is the student information system the District uses for grades and attendance.
- Parents and students can access their information by creating an account in the Aeries Parent Portal.

### Bellxcel

- This Project is build using React JS, TypeScript, HTML, CSS and Material UI.
- This is an educational platform supporting NGOs in organizing extracurricular activities.
- Contributed to program creation, managing branches, adding and maintaining scholars, tracking attendance, and overseeing tasks and events.

## CERTIFICATES

### React Nano Degree By Udacity (11/2022 - 01/2023)

*The Nano degree enabled an understanding of React and Redux from basics and led to the development of Book Store and Employee Poll projects during this certification.*
