PROFILE

Team Lead with around 11 years of experience. Expertise in C#, .NET, React, SQL, Data visualisation and Cloud based microservices with a track record of delivering high-quality software solutions to clients. Skilled in mentoring teams, designing and developing complex systems, and leading successful software projects. Looking for a lead role in an organisation with focus on developing products or delivering high-quality solutions.

WORK EXPERIENCE

Consultant

GlobalLogic Sep' 2019-Present

- Designs and develops an Analytics software using .NET 6 based microservices.
- Designs and develops a data visualization tool using React and .NET 6.
- Leads a team of 10 members across the two projects.
- Involved in all steps of SDLC from requirement gathering to final deployment to client.
- Participates in presales activities like RFP responses, pitches and creating RFI docs.

Lead Engineer

HCL Technologies Aug 2016-Sep 2019

- Helped develop a CMS platform and video player for a leading US social news platform.
- Integrated multiple third party video players and ad sense for the first player using JavaScript and .NET MVC.
- Helped developed CMS platform with an ingestion pipeline managing hundreds of articles, videos and slides every hour from thousands of sources. Pipeline used .NET MVC while CMS UI was built in React.
- Collaborated with end customers troubleshooting issues focusing on quick mitigation and resolution.
- Led a team of 3 members.

Software Engineer

Infomatrix Inc Dec 2015-Jul 2016

- Owned delivery of multiple modules as an individual contributor in a team developing a B2B eCommerce solution using .NET MVC and jQuery.
- Gathered requirements, created designs, developed features and finalized deployment strategies.
- Implemented support for multiple 3rd payment gateways like PayPal and Authorize.NET.
- Collaborated with customer's development team, participating in design discussions.
- Troubleshot customer issues, creating critical patches as necessary.
