WEB DEVELOPER INTERN

Worked as Wordpress Web Developer for 4 months.
As part of the project, I have develop many websites and form different landing pages and add products in commercial websites.
Developed many e-commerce Website, Food Website, Real Estate Website etc.
During the Internship I have learnt about the Plugins like Elementor pro, Slider revolutions, woocommerce, Paypal and Razorpay Integration, Product Listing etc. and the theme like Astra, Woostify, Real Estate theme and many more.

SKILLS

C Programming	HTML	Javascript	Node.js	MySql	Render
C++ Programming	CSS	React.js	Express.js	Wordpress	Heroku
Java Programming	Bootstrap	Angular.js	MongoDB	Git & Github	Data Structure

PROJECTS

FLICKNEST MOVIE WEBSITE ⬀

I have created this website using Html, Css, Javascript, React.js, Node.js, Express.js and MongoDB.
As the part of the project, I have created the login page, signup page, home page and connected it with the database.
In this project I have used The Movie Database (TMDB) api to shows the details of the movie that is available in website.
I have also used the Infinite Scroll React Component to add the infinite scroll property in the website.
In the logged in and signup page i have used the api to change the background image after a interval of time or after when we refresh the website.
Website Link (Netlify + Render) : https://flicknest.netlify.app/
Backend Link (Render) : https://flicknest.onrender.com/

BQ ECOMMERCE SHOPPING WEBISTE ⬀

I have created this website using Wordpress.
In this Project I have Wordpress astra theme and various plugin like elementor, woo-commerce
As the part of the project, I have added some commercial products i.e, simple product, affiliated product, product variation etc as well as i have added a Razorpay payment method for making the purchase successfull.
Website Link (Netlify) : https://bqshop.netlify.app/

AK FOOD DELIVERY WEBISTE ⬀

I have Created this Website using Html, Css, Javascript, Bootstrap, React.js, Node.js, Express.js and MongoDB.
In this Project I have added a search bar that is used to search the food available in the website.
I have also added a cart window showing a close button where we can add the food and order the food.
I have also added order section where we can see the latest food order by the client as per the date Preferences.
I have also created a Login and Signup Page and connected to the mongoDB atlas.
Website Link (Netlify + Render) : https://foodqual.netlify.app/
Backend Link (Render) : https://food1-4ykf.onrender.com
