Key Skills

Java, Spring Boot , Microservices,
HTML & CSS
Database : MySQL ,
MongoDB

EMPLOYMENT

Software Engineer	MITYUNG	Jan 2022 - Jun 2023
<ul style="list-style-type: none">I am a backend developer in Medzinc and Prakaram.Developed backend for MedData-X A medical data exchange platform designed to streamline the way care providers communicate with each other and with patients, creating a framework for universal interoperability.Designed and developed multiple RESTful API's such as CREATE,UPDATE ,GET, DELETE,SEARCH. Used in EMR Integration.The MedData converter facilitates medical data (FHIR, HL7, X-12, and CCD) conversion and data exchange framework. It has the ability to transform and normalize disparate data sources into a unified format that can be used by healthcare providers and other stakeholders in the healthcare industry.I worked on HL7 to FHIR Converter and both HL7& FHIR Validation.CCDA to FHIR Converter and both CCD & FHIR Validation.Designed and developed an API for Integrating Multiple EMR like EPIC , CERNER, athenahealthImplemented HL7 to EDI 837Designed and developed an API for uploading EDI 837 and downloading CSV files.Implemented a feature for sending notifications via email.I worked on Email TemplateI implemented Email concepts and wrote the logic for processing of docx/pdf files and added watermarks to those.I worked on OCR, that's why I got more information about OCR.I worked on Cyber Security using the tools Burp Suite, OWASP ZAP and OpenVAS.		

EDUCATION

B.Tech , CSE KIET Group of Institutions, AKTU	7.63 CGPA July 2018-21
Diploma, CSE Govt. Polytechnic – UPBTE	77.25% July 2015-18

Projects

Medzinc: Medzinc is an interoperability engine, leverages scalable technology architecture and advanced algorithms aimed at facilitating Integrated care-management and value based care.

Tech Used: JAVA, Spring Boot, MongoDB, REST APIs, JSON Web Token (JWT).

ParaKaram (Simplified Hiring): ParaKaram is a data-driven recruitment service provider that leverages advanced artificial intelligence algorithms and scalable technology platforms to simplify and accelerate the hiring process for its customer.

Tech Used: JAVA, Spring Boot, MongoDB, REST APIs
