EDUCATION

G. L Bajaj Institute Of Management And Technology

Bachelor Degree   Jan 2013 - Dec 2017

B.N.S.D Shiksha Niketan Inter College

Intermediate   Dec 2013

PROJECTS

Frued Technologies   Jan 2024 - May 2024

Chetu India

FruedTechnologies Online Game is an interactive gaming platform where users can create multiple profiles and play games within specific viewport sections. Additionally, the project includes a CRM (Customer Relationship Management) system to manage player details and scores. Users can access their profiles, track their scores, and compete with other players in real-time.

Roles & Responsibilities:

- Analyzing requirements specified in Jira tickets and translating them into actionable tasks.
- Implementing functionalities within specific modules of the game platform according to the defined requirements.
- Designing and developing user interfaces for the game platform using React.js and Material-UI library.
- Creating responsive and visually appealing viewport sections for gameplay and profile management.
- Collaborating with team members to review code changes and resolve any merge conflicts or issues.
- Automating the build, test, and deployment processes to streamline development workflows and ensure code quality.

Milford RealEstate   Jan 2023 - Jan 2024

Chetu India

MilfordRealEstate is an online platform developed for a real estate company, providing both end users and internal employees with tools to facilitate property transactions. The platform includes a user-facing website where visitors can browse available properties, view details, and register to raise queries. Additionally, a CRM (Customer Relationship Management) system is integrated for internal employees to manage leads, communicate with users, and track transactions.

Roles & Responsibilities :-

- Creating project plans and timelines based on client requirements, scope, and resources available.
- Designing and developing user-friendly interfaces for the website using HTML, CSS, Bootstrap and CoreUI.

- Ensuring the design meets usability and accessibility standards to provide an optimal user experience.

- Implementing API endpoints and handling data transformation to ensure seamless integration with third-party services.

- Managing deployment processes using Git for version control, CI/CD pipelines for automated testing and deployment, and Docker for containerization.

Feed Pro   Jan 2022 - Jan 2023

Chetu India

Feed Pro is a web application developed for the agriculture domain, designed to streamline logistics operations for truck drivers. The app provides real-time visibility into load status, tracking remaining inventory on the truck, deliveries made, and upcoming delivery requirements. Integrated with onboard weight measurement systems, truck drivers can accurately monitor load quantities and plan their routes efficiently. This enables drivers to manage their schedules effectively and ensures smooth operations throughout the day.

Roles & Responsibilities :-

- Understand their requirements and pain points in truck logistics operations.

- Integrating with onboard systems and sensors installed on trucks to capture real-time data on load quantities, weight measurements, and delivery status.

- Designing intuitive user interfaces for the Web application using Electron JS , ensuring ease of use and accessibility for truck drivers.

- Implementing features such as inventory tracking, delivery status updates, and route planning to enhance user experience and productivity.

SKILLS

HTML5, CSS3, Bootstrap, JavaScript, MaterialUI, CoreUI, ReactJS, ElectronJS, TypeScript, NodeJS, MongoDB, Json, StencilJS, CI/CD Pipeline, GIT
