Teaching.

Debating.

Amit Rawat

I'm happy to submit my application for your organization and obtain new skills and enhance my knowledge in the field of Software Development. I need to advance my career by working with a dynamic organization like yours and I am confident enough that my knowledge in HTML/CSS, JavaScript, etc. will prove an asset to your company. Experienced in building responsive, user-friendly websites and applications using modern front-end technologies, including React. Passionate about clean, efficient code and continuously staying updated with the latest web development trends. I'm hoping to grow my career as I adopt responsibilities and put my skills and knowledge to work with your accomplished team. I have the soft skills needed like team work, leadership quality, time management etc.

Experience

Software Developer Trainee, Qualtech Edge

August 2024-Present

Worked on projects using React, building dynamic and responsive user interfaces.

Worked with databases like PostgreSQL, and proficiency in utilizing Python, Power BI, and technologies like PySpark for data analysis and processing.

Projects

Food Cart

Key Skills- React.js , CSS, JavaScript

A web application to order food online. Created a UI using React hooks like useState, useEffect and etc.

Project link- <https://github.com/Amit-Rawat-098>
