- **Mahatma Jyotiba Phule Rohilkhand University** Bareilly, India
Bachelor of Commerce April 2017 - March 2020

PROJECTS

- * **Blog:** Live URL [GitHub Repository](#) [GitHub Repository](#) A simple blog where users can create an account, log in, like and comment on posts, and view other authors' profiles. The frontend is built using React, Redux Toolkit, Reactstrap, and Firebase. The backend is implemented using Spring Boot, JWT-based Spring Security, and Spring Data MongoDB. (Feb '23)
- * **Restaurant Website:** Live URL [GitHub Repository](#) A restaurant website where users can register, log in, browse menu items, add them to the cart, and place orders. Admins can manage menu items and update order statuses. The project is built using Spring Boot MVC, Thymeleaf as a template engine, MongoDB for data persistence, and Spring Security for role-based authentication and authorization. (March '24)
- * **LinkedIn Clone:** Live URL [GitHub Repository](#) A LinkedIn-like platform with features such as liking posts, creating posts, trying premium, and viewing user profiles. The application is designed to be responsive across various devices. Tech Stack: ReactJS, Redux, Tailwind, Firebase. (Dec '23)

CERTIFICATES
