PROFESSIONAL SUMMARY

Results-driven Software Engineer with expertise in full-stack development, dynamic web applications, and scalable solutions. Skilled in modern JavaScript frameworks and database management, with a strong focus on building user-centric platforms, reporting dashboards, and secure payment integrations.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript
 - **Frameworks:** Node.js, NestJS, Next.js, Angular, Express.js, React.js
 - **Databases:** MySQL, PostgreSQL, MongoDB, TypeORM
 - **Other Tools:** Docker, Stripe, Razorpay, Zapier, payU
 - **Languages:** English, Hindi, Punjabi
-

EXPERIENCE

Plutos One | Software Engineer

2024 – Present | Noida, Uttar Pradesh

- Built a dynamic AI-SaaS platform for BBPS payments with cross-project data sharing via unique agent IDs.
- Designed reporting dashboards for data analysis and executive decision-making.
- Developed organization-wide dashboards for campaign management and UI customization.
- Implemented a CBMS to enable banner uploads, heading updates, and campaign executions.
- Deployed scalable projects across multiple domains, ensuring seamless user experiences.

DevexHub Pvt. Ltd. | MERN Stack Developer

2022 – 2024 | Mohali, Chandigarh

- Built and maintained web applications using the MERN stack.
 - Integrated Stripe for secure, seamless payment transactions.
 - Mentored interns in best practices for MongoDB, Express.js, React.js, and Node.js.
-

PROJECTS

AI-SaaS Payment Platform

- Enabled cross-project agent data retrieval with dynamic ID-based functionality.
- Deployed scalable platforms for BBPS payments across domains.

Reporting Dashboards

- Created dashboards for product data analysis and project growth tracking.
- Enabled campaign creation, performance tracking, and UI customization.

Voucher Management System (VMS)

- Provided real-time voucher inventory insights, including sales trends.
- Integrated CAMS APIs for seamless organizational voucher management.

Event Management System (EMS)

- Developed poll-based user engagement with coin-based rewards and redemption.
- Gamified experiences with streak-based rewards and loyalty incentives.

User Management System (UMS)

- Built centralized authentication for user registration/login across projects.
- Streamlined multi-project user access and management.

Gift Card Platform

- Integrated PineLabs API for gift card purchases with RazorPay.
 - Conducted end-to-end validation of the gift card flow.
-

EDUCATION

Chandigarh University

Master of Computer Applications
2023 – Present | Chandigarh

HP University

Bachelor of Computer Applications
2019 – 2022 | Shimla

ADDITIONAL HIGHLIGHTS

- Developed milestone-based streak rewards to enhance user engagement.
 - Unified multiple servers under a secure and validated system.
 - Optimized database queries in MySQL and PostgreSQL for performance improvements.
 - Implemented the NestJS repository pattern to future-proof backend systems.
-
