 ankitkumar.sde@gmail.com

I am a Frontend Developer from Delhi NCR with more than 6 months of hands on experience in frontend development in various frontend technologies. Along with that I have created some great personal projects which gave me a great learning curve. I have gained great knowledge about Next.js, React.js and Javascript along with Tailwind CSS. Thus I want to implement those learning into real world projects and help the organization for its betterment as well as to grow my career. I am keen to learn and enhance my skills for the betterment of the company.

Skill Set

- Next.js
- React.js
- Javascript
- CSS
- Github
- Tailwind CSS

Experience

● Aashiya Technologies Private Limited

Frontend Development Intern

Completed a 6-month internship in frontend development, where I actively contributed to the design and implementation of user interfaces for web applications. Worked extensively with **HTML, CSS, JavaScript, React, and Next.js** to create **responsive and interactive web pages**. Collaborated with senior developers to improve code quality and optimize performance. Gained practical experience in **version control** with **Git**. Developed a strong foundation in modern frontend technologies, enabling me to work effectively in dynamic development environments and contribute to delivering high-quality web solutions.

Personal Projects

● Tour Guide Website

Next.js, Tailwind CSS, Firebase

I developed a dynamic tour guide website using **Next.js** and **Tailwind CSS**, focusing on creating a **responsive and user-friendly design**. I also used **Swiper.js**, The website integrates **Firebase** to fetch and display real-time user reviews, enhancing interactivity and engagement. In addition to the main home page, I implemented other essential pages, including About Us, Contact, and Privacy Policy, to provide comprehensive information and ensure compliance. The site is **hosted on Vercel**, which optimizes its performance and ensures seamless accessibility.

I have hosted this website on the following Link :-

● E-commerce Website

HTML, CSS, JavaScript

I developed frontend of an E-commerce website. To develop the frontend of the website I used **HTML, CSS & Javascript**. I used many Javascript events to improve the user experience. I also used **media queries** to make the website **responsive**. It gave me a great learning curve about the Javascript and its different events. I also enhanced my media query skills. Along with all this I also embed the google maps in the website.
