Passionate Software developer with 1.5 years of experience building modern and responsive web applications. Proficient in translating UI/UX designs into high-quality code and collaborating with cross-functional teams. Dedicated to staying current with industry trends and continuously improving skills.

Professional Experience

Wits Innovation Lab (Frontend Developer (React js))

Jan 2023 -Present

- Developed and implemented a **PlanIT** project management tool that streamlined task tracking, team collaboration, and project workflow efficiency within our organization. The tool aimed to enhance productivity and project visibility. Resulting in a **50%** reduction in software licensing and subscription costs.
- Contributed to the optimization and enhancement of the **company's official website**, resulting in noticeable improvements in performance and user experience.
- Developing and maintaining dynamic and interactive user interfaces using **React, JavaScript**, and **Typescript**. Utilized **Redux** and **Context** for state management, improving code organization and reusability across different components.
- Developed a comprehensive **Human Resource Management System (HRMS)** web application, empowering organizations with streamlined employee management processes for enhanced efficiency and productivity. This encompassed robust modules for managing employee information, tracking attendance, handling leave requests, conducting performance evaluations, generating insightful reports and analytics, and ensuring secure user authentication and data protection.

Skills

Frontend Technology - Html, CSS, JavaScript, TypeScript, React, Redux, Ant Design, MUI, RESTful API, Context API.

Other - Git, Babel, Debugging, Unit Testing, Jest, Enzyme.

Projects

ElectroCart

Developed a fully functional e-commerce platform specializing in electronic gadgets, leveraging the MERN stack for robust and efficient development.

Frontend Tech: React.js, TypeScript, JavaScript (ES6+), Redux, RESTful API, Ant Design. HTML5, CSS, Styled Component

Backend Tech: Node js, Express, MongoDB.

Key Features: Product listings, Shopping cart, User Authentication, Payment gateway, and Order Management.

Wil-Events

Designed, developed, and deployed a web application that provides real-time updates on events and activities in a user-friendly format, enhancing user engagement and event participation.

Technology: React, Typescript, HTML/CSS, Strapi

Displayed a comprehensive list of events, including details, dates, and locations
