WORK EXPERIENCE

Transverser Labs Private Limited

                                        2023 (AUG) - PRESENT

  Web Developer

- Engineered a responsive, cross-browser compatible UI framework using Vue and JavaScript, reducing code duplication and improving maintainability.
- Implemented testing protocols using Cypress and streamlined task and defect management using Jira.
- Collaborated with UX designers to design and develop an intuitive, data-driven dashboard, enhancing user experience and simplifying data visualization. Enhanced UI scalability and reusability by developing reusable Vue
- components, enabling faster development cycles for future features.
- Collaborated in Agile teams by participating in sprint planning, daily stand-ups, and retrospectives to ensure timely delivery of tasks.
