## EDUCATION

### BCA

Maharishi Arvind University

08/2018 - 07/2021

Jaipur, Rajasthan

#### Courses

- Bachelor's Of Computer Application

### MCA

Suresh Gyan Vihar University

09/2021 - 08/2023

Jaipur, Rajasthan

#### Courses

- Master's Of Computer Application

## WORK EXPERIENCE

### Frontend Developer EtechCube

11/2020 - 07/2021

#### Achievements/Tasks

- Pioneered the creation of a dynamic Food Ordering project using React JS, demonstrating proficiency in Redux, custom hooks, and nested-routing for enhanced functionality.
- Employed React's component-driven structure, proficiently managing state and reusable hooks to boost code efficiency and bolster frontend capabilities.
- Utilized Tailwind CSS's utility-first methodology to expedite style development, leading to streamlined and adaptable UI designs.

### Web Developer

Dr Nature Wellness Pvt Ltd

03/2023 - 09/2023

Jaipur

#### Achievements/Tasks

- Demonstrated expertise in responsive web design by seamlessly combining Tailwind CSS and React, resulting in cross-device compatibility and an optimized user experience for web applications.
- Implemented one-way data binding techniques, harnessed the power of conditional statements, and leveraged the modular nature of components to drive web application performance and user experience improvements, all while maintaining code simplicity and ease of extension.
- Employed JSX (JavaScript Syntax Extension) fluently to craft expressive and interactive user interfaces, ensuring seamless communication with the Virtual DOM for enhanced web application performance and responsiveness.

SQL

SDLC

## PERSONAL PROJECTS

Food Ordering App Using React JS, Parcel, Redux

- Utilized nested routing and hot module reload for seamless navigation and real-time updates.
- Designed the UI with Tailwind CSS, incorporating shimmer effects and lazy loading for enhanced user experience.
- Implemented Redux for state management, ensuring seamless data flow and enhanced user experience.
- Employed Babel for transpiling JavaScript code, optimizing compatibility across different browsers.

FullStack React Ecommerce Project using Next JS , Sanity, Stripe

- Led the development of a FullStack React Ecommerce project using Next JS, Sanity CMS, and Stripe.
- Implemented file-based routing, data fetching, server-side rendering, and static generation.
- Integrated Stripe for secure payment processing and seamless checkout experiences.
- Utilized Sanity CMS for efficient content editing and organization, empowering content creators with a user-friendly interface.
