SKILLS

Backend Development
- Node.js
- Express
- RESTful API's

Frontend Development
- React
- HTML & CSS
- Tailwind CSS

DataBases
- MySQL
- MongoDB

Programming Language
- JavaScript

EDUCATION

Bachelor of Computer Application

IGNOU University Delhi

📅 2021 - 2024

AISSCE

Class XII

Government Boys Senior Secondary School

📅 2020 - 2021

📍 New Delhi

PROJECTS

ParkingHub - Parking Management System
- Developed a parking management system with React and MySQL, reducing parking allocation time for users.
- Developed an interactive map feature using React Leaflet, enhancing user experience.
- Implemented backend RESTful APIs for user authentication and parking management, improving system efficiency and reducing errors.
- Link:// ParkingHub

Unitflipper - A Unit Convertor
- Implemented a unit conversion feature that decreased calculation time, enhancing user experience for customers.
- Created a streamlined conversion application focusing on length, weight, and temperature, boosting task completion speed for users.
- Created a streamlined two-panel layout for value input and unit selection, enhancing conversion speed.
- Link:// unitflipper

EmpBase - A Employee Portal
- Engineered a secure login system that improved user authentication speed, while maintaining data protection compliance.
- Implemented centralized error handling, enhancing API response consistency and reducing response discrepancies.
- Executed CRUD operations on employee records through RESTful APIs, enhancing data retrieval speed.
