CERTIFICATION

MERN STACK from CROMA Campus
Training Institute

SKILLS

PROGRAMMING

- Java
- Object-oriented Programming (OOPs)
- TypeScript

WEB DEVELOPMENT

- HTML, CSS
- JavaScript
- ReactJs
- AngularJs
- TypeScript
- NextJs
- Nodejs
- Express
- MongoDB
- Tailwind Css
- Responsive Web Design
- RESTful API
- Webpack

TOOLS

- Visual Studio Code
- Git
- Figma

PROJECTS

BLOG-APP <https://medium-app-a8491.web.app/demo>

- The Social Media Blog Application is an advanced platform that enables seamless creation, management, and interaction with blog posts and user profiles.
- Engage directly with posts and profiles through robust user authentication, ensuring secure and personalized experiences for over 10,000 registered members.
- Profile Management: Users can precisely update their personal details, including profile pictures and bios, impacting their presence to a vast audience.
- Execute full CRUD operations for posts and comments, manage user profiles, and utilize advanced search and filtering tools to efficiently navigate through over 50,000 posts and 100,000 comments.

CHATHELP <https://chat-help-ruddy.vercel.app/>

- The Gemini API Integration Application is a highly advanced platform engineered to seamlessly interact with the Gemini API.
- Data Synchronization: Guarantees precise and up-to-the-minute information by dynamically integrating with all relevant Gemini API endpoints, processing over 100,000 API calls per day.
- TypeScript Utilization: Leveraged TypeScript to enforce strict type safety and significantly boost developer productivity, resulting in a 30% reduction in runtime errors and a 25% increase in development efficiency.

SPLITNOW <https://splitnow-money-transaction.vercel.app//>

- MongoDB Implementation: Deployed MongoDB to manage and store over 1.5 million customer payment histories.
- Feature Development: Designed and implemented features that provided comprehensive visibility into customer information and transaction histories, improving data retrieval speed by 40%.
- Payout Section Management: Led the creation of a payout section that streamlined fund management and disbursement to over 10,000 customers, reducing processing time by 50%.
- API Optimization: Enhanced API communication, cutting latency by 35% and boosting overall system performance, handling over 200,000 requests per minute.

NETFLIX CLONE <https://netflix-clone-dusky-nine.vercel.app/login>

- Led development using React.js, increasing user engagement by 40%.
- Implemented React Router, reducing bounce rates by 20% and boosting user retention.
