

Anurag Sharma

anuragusict09@gmail.com | 9873455687

EDUCATION

USICT, GGSIPU

MCA

Expected May 2024 | Delhi, India
Cum.GPA:8.13/10.00

Rajdhani College, DU

Bsc Physics Hons.

July'18 - July '21

CGPA -8.29/10

TECHNICAL SKILLS

Programming

- C++
- SQL

Web Development

- HTML, CSS, and JavaScript
- Tailwind CSS
- React.js
- Node.js and Express.js
- MongoDB and MySQL

Developer Tools

- Rest APIs
- VS Code
- Postman
- Git and GitHub

COURSEWORK

GRADUATE

- DataStructure
- Operating System
- Database Management
- OOPs
- Computer Networks
- Software testing methodology

PROJECTS

GitHub Profile Viewer [Link](#)

- A React application that fetches and displays GitHub user profiles and repositories, showcasing user details such as avatar, name, bio, company, location, and account creation date, with sorting options by size, stars, and forks, and filtering repositories by top 3, 6, 9, or all.
- Provides navigation to view followers and followings, featuring a responsive and interactive user interface for an enhanced user experience.
- Tech stack : HTML, Tailwind CSS, JavaScript, React.js

StudentPulse: Blogging Application [Link](#)

- Streamlined CRUD operations by implementing an intuitive and user-friendly interface.
- Empowering admin with the ability to create, edit, and delete their posts while ensuring they only read posts from others, showcasing a robust authentication system at the heart of the experience.
- The stacks backend, built with Express.js and Node.js, ensures a secure and scalable foundation.
- Tech stack: HTML, Bootstrap, JavaScript, React.js, Node.js, Express.js, MongoDB.

Food Fire

- Project is an innovative food ordering website built using React and JavaScript, with certain features or design elements inspired by Swiggy. It takes the core concepts of online food ordering and adds unique features or a personalized design to differentiate itself.
- Key Features:-
- **Hooks and Routing:** Utilize React hooks for state management and routing to create a dynamic and responsive user interface.
- **API Integration:** Fetch real-time data from a food delivery service API, similar to Swiggy, to display restaurant listings, and other relevant information.
- Tech Stack: React.js, JavaScript, and Tailwind CSS.

TRAINING AND CERTIFICATIONS

Node JS -Master the Fundamentals | [Link](#)

- **Comprehensive Introduction:** Gain a solid understanding of Node.js fundamentals, including asynchronous programming, modules, and the Node Package Manager (npm).
- **Hands-On Learning:** Practice building real-world applications, such as RESTful APIs, using Express.js and learn best practices for error handling and testing.

ACHIEVEMENTS

- **Security Coordinator**, College Tech Fest (Info'X) Managed security protocols and coordinated personnel for a college tech fest, ensuring attendee safety and event success.
- Placement Coordinator, USICT
- National Cadet Corp (C Certificate) - Delhi Directorate
