

# Arya Choudhary

choudharyarya7906@gmail.com|(91)7906185201

Saharanpur, UttarPradesh

## Summary

Skilled Frontend (Angular) Developer with gift for prioritizing and managing several milestones of various projects simultaneously. Talented at code writing, using version control systems and performing thorough testing protocols. Detail-oriented to write detailed technical specifications.

## Experience

### Directorate Of Governance and Reforms(DGR)

Frontend (Angular) Developer

Chandigarh

11/2023–Present

- I have gained experience working on various government official projects in this organization.
- Utilized Angular, Angular Material, Bootstrap, SCSS, CSS, JavaScript, MySQL and .NET technologies to enhance the user experience and overall functionality of web applications.

### Viithiisys Technology

Frontend (Angular) Developer

Chandigarh

- Experienced in developing and maintaining scalable applications with efficient coding techniques. Successfully applied expertise in API integration with GraphQL and HTTP to enhance efficiency through effective error handling, routing, and pagination procedures.
- Successfully applied expertise in API integration with GraphQL and HTTP to enhance efficiency through effective error handling, routing, pagination procedures.

## SKILLS

Angular | Angular Material | Bootstrap | CSS/SCSS/TailwindCSS | HTML | JavaScript | NodeJS | MongoDB | GIT

## Education

### A.K.T.U

Bachelor of Science in Computer Science

Meerut

2016–2020

### M.D.A.VinterCollege

Intermediate

Saharanpur

2014–2016

## Strengths

TypeScript Proficiency | Communication Skills | Problem-Solving Skills | Continuous Learning and Adaptability

## Projects

### Vizitor Management System

VMS is a leading cloud-based visitor management system designed to streamline and automate the visitor check-in process for businesses. It enhances security, improves operational efficiency, and provides a seamless experience for visitors. As a complete solution for visitor tracking, VMS integrates digital check-ins, badge printing, and data management for organizations across multiple locations. The Modules we are providing in VMS are like Visitor Management System, Delivery Management System, Attendance Management System, Meeting Room Booking Management System, Employee Magement System.

**Technologies:** Angular, Angular Material JavaScript, Graphql, HTML,SCSS

### Punjab Admission Portal

The Punjab admission portal, [admission.punjab.gov.in](http://admission.punjab.gov.in), is\*\* \*\*a centralized platform for admission to government, aided, and private colleges in Punjab. The portal was developed by the Department of Governance Reforms (DGR) and the Department of Higher Education (DHE). It aims to make the admission process transparent and easy for students.

**Technologies:** Angular, Angular Material JavaScript, Graphql, HTML, SCSS
