EXPERIENCE

Software Developer Intern

Anirvana Pvt Ltd

November 2023 – March 2024 | Hyderabad, India

- Developed two distinct CRM systems, Handle and Dreamshala, for educational startup. These systems were designed to optimize sales operations and elevate customer communication strategies.
- Implemented a feature allowing navigation links to open within the same web page as new tabs, mirroring the behavior of the Web browser.
- Leveraged core JavaScript to implement Drag and Drop functionality, providing users with an intuitive interface for organizing and managing data.
- Designed and developed a Drag and Drop form builder equipped with a variety of customizable options, including text fields, dropdown menus, multi-select fields, numerical inputs, and email fields, enhancing user flexibility and customization capabilities.
- Develop a dynamic table using Material-React-Table, incorporating advanced functionalities like column visibility toggling, drag-and-drop column rearrangement, row selection, and export options for CSV and PDF formats. Additionally, implement a feature to save the current table view for user convenience.
- Successfully integrated EmailJS, enabling efficient sending of emails directly from the application.

### React Developer Intern

NetArt

June 2021 – August 2021 | Coimbatore, Tamil Nadu

- Develop and implement responsive user interfaces using React.js, ensuring cross-browser compatibility and optimal performance.
- Work with backend developers to integrate front-end components with RESTful APIs, ensuring seamless data flow and functionality.
- Received positive feedback from clients for delivering high-quality, pixel-perfect UIs that met their design specifications and exceeded their expectations.
- Worked on Wordpress to develop web pages of multiple websites from e-commerce to blog.

SKILLS

C/C++ | DSA | OOPs concept | HTML | CSS | JavaScript
React.js | Mongodb | Node.js | Express.js | Redux-toolkit | Git
Github | Material UI | Next.js | Material-react-table

SOFT SKILLS

Learning Potential | Team Work | Organization | Flexibility
Professionalism | Responsibility | MultiTasking
Work Under Pressure

PROJECTS

Story App

https://story-read.netlify.app/

- The platform is a Story Posting and Reading app built with the MERN stack, using MongoDB, Express.js, React.js, and Node.js. User authentication is handled with JWT and Bcrypt.
- It features an Admin Panel for user management and moderation, along with a user-friendly interface for posting, reading, editing stories, and updating profiles, ensuring smooth UI.

Get Code

https://getcode.netlify.app/

- It developed on react.js. It provides boilerplate/template of multiple data structures like stack, queue, etc in C language. By just one click whole boilerplate can be copied to clipboard and file downloadable also.
- Not only template but also some of the common functions of data structure like print list, push etc. Which is copied to clipboard by just one click.

EDUCATION

Bachelor of Technology in Computer Science Engineering

Dr. A.P.J. Abdul Kalam Technical University

2019-2023 | 7.87 CGPA

Class 12th (CBSE)

Univarsal Public School, Baburi

2017 - 2018 | 84.6 %

LANGUAGES

Hindi ●●●●○
English ●●●●○

ACHIEVEMENTS

- In top 5%, Developing Soft Skills and Personality, NPTEL course.
- Solved 180+ questions on GFG.
- Got 3 digit rank in BHU b.sc entrance exam (2019).
