PROJECTS

Personal Portfolio Website

https://ashish-portfolio-seven.vercel.app/

📅 01/2024

- Built a stylish, user-friendly portfolio with React, Tailwind CSS, and Three.js for seamless cross-device experience. Implemented
- Framer Motion for seamless animations, enhancing visual appeal and user engagement.
- Showed off my web skills by making a website that's creative and works great.
- Integrated MailJS for efficient contact form messaging.

Insight Hub (Blog Web App)

https://blog-app-umber-five.vercel.app/

📅 12/2023

- Created a blog web app using React, Redux Toolkit, and Tailwind, enabling users to add, edit, and delete blog posts.
- Integrated Appwrite for backend functionalities, including user authentication, ensuring a secure and efficient blogging experience.
- Designed a user-friendly interface with React and Tailwind CSS, prioritizing simplicity and ease of use.
- Implemented Redux Toolkit for streamlined state management, enhancing the app's responsiveness and data flow.

LinkedIn Clone

https://linkedin-clone-lac-eta.vercel.app/

📅 12/2023

- Developed a LinkedIn clone using React, Redux Toolkit, and Tailwind, allowing users to post and share information.
- Integrated Firebase for backend support, ensuring secure user authentication and data storage.
- Designed an intuitive user interface for seamless navigation and information sharing.
- Implemented features for users to post, edit, and manage their information, enhancing the overall functionality of the LinkedIn clone.

Netflix Clone

https://netflix-clone-phi-lemon.vercel.app/

📅 11/2023

- Built a Netflix clone using React, Context API, and Tailwind, allowing users to save movies for later.
- Integrated Firebase for backend functions and user authentication, ensuring a secure and personalized experience. Developed
- a user-friendly interface with React, offering an intuitive and engaging streaming environment.
- Implemented features for users to easily manage their watchlist, enhancing the overall functionality of the Netflix clone.
