- Automated Testing Tools: Postman, API, SoapUI and Swagger.
- Defect Tracking Tools: JIRA, Bugzilla, MantisBT.
- RDBMS/Database: SQL Server.

Professional Experience:

OATIndia Pvt Ltd, Mohali, City in Punjab- Quality Analyst

Jan-2022-Present

Description of Manual Testing Project:

OATI is an internationally-recognized company for the development of sophisticated software applications in today's energy industry. OATI enable reliable energy and empower utilities, cities, and other distributed energy providers to integrate smart grid technologies and optimize power supply with grid reliability. I have worked on the WebDistribute.

- **WebDistribute**

The WebDistribute project is an IoT-based system that monitors and controls various aspects of electricity field operations. It collects data using sensors and devices on critical parameters such as power consumption, Voltage level, renewable energy generation, Current flow rates etc. This data is analyzed and used to automate processes such as electricity control, grid monitoring, and Voltage level regulation. The webDistribute system provides real-time data visualization and alerts for operators to quickly respond to electricity- related issues, while enhancing overall efficiency and sustainability.

Description of Manual Testing Project:

Code Pulse Development & IT Services is a software development company that builds software, Plugins, Extensions mostly for Word Press websites. I used to handle testing for multiple projects Including Plugins, Software, Extensions, etc. I have worked on the Mango Pay Gateway, RMA (Return Merchandise Authorization).

- **Marketplace Product RMA for Word Press Woo Commerce:**

WordPress WooCommerce Marketplace Product RMA (Return Merchandise Authorization) allows you to set up a system for customers to request a return easily. With the help of this module, the customer can return the products, have them replaced or refunded within the specified time limit. The seller can add RMA reasons and shipping labels as well for the customer.

- **Mango Pay Gateway**

Marketplace Mango pay Payment Gateway for WooCommerce plugin is an ideal end-to-end payment solution for the marketplace owners and sellers as it enables the platforms to accept online payments through multiple methods, including cards and direct debit. Multi-Vendor Mango pay Payment Gateway for WooCommerce will split the payment to multi sellers. Mango pay can hold the fund (escrow) on segregated accounts, in trust. Furthermore, it fully automates the payouts.

Education:

Masters of Computer Applications from Maharshi Dayanand University 2020
