OBJECTIVE

Software Developer with over 2 years of experience in React and React Native, currently seeking full-time frontend developer roles to utilize their expertise and contribute to innovative projects in a dynamic and growth-oriented environment.

EDUCATION

Bachelor of Computer Applications 2018 - 2021
Jagan Institute of Management Studies (GGSIPU)

SKILLS

ReactJs, React Native, Redux Toolkit, Jest, HTML, CSS, Javascript, Typescript, Responsive Web Design, SEO, Storybook, Nx Workspace

EXPERIENCE

Software Engineer Sept 2023 - Present
Lynkit Solutions Pvt Ltd *New Delhi, India*

- Developed and enhanced features for Lynktrac, a security and asset tracking system, using ReactJS and Redux.
- Integrated Google Maps API for geofence plotting, route plotting, and track visualization.
- Successfully Integrated Socket.IO to receive real-time data from devices, enabling dynamic track plotting on Google Maps.
- Optimized the application for improved user experience and performance, ensuring efficient handling of high-frequency data updates.
- Conducted thorough testing and debugging using Jest and other testing frameworks to ensure robust and reliable features.

Frontend Developer Aug 2022 - Sept 2023
Techdome Solutions *Remote*

- Developed and collaborated on the Kwicon mobile app, connecting high school students with career advisors, utilizing React Native and TypeScript.
- Integrated Realm database for data management and maintained chat functionality using QuickBlox SDK.
- Took charge of iOS development, resolving UI and functionality issues to enhance user experience.
- Led the development of Domigo BMS, a mobile and web-based booking management system for a dog hospitality facility.
- Implemented Server Side Rendering for an interactive static website and utilized micro-frontend architecture for the web admin panel to ensure scalability and maintainability.

Frontend Developer Intern May 2022 - Aug 2022
Techdome Solutions *Remote*

- Worked on a data-driven web application and implemented RESTful APIs using Redux-Toolkit and Axios.
- Developed a web application to manage timesheets featuring role-based access control, integrated CRUD operations, and utilized JWT authentication for enhanced security.
- Worked in an agile environment, using Azure DevOps to track project progress and ensure effective communication within the team.
