PROJECTS

SPOTIFY WEB APP CLONE

🔗 | [SOURCE CODE](#) 🔄

- Implemented user authentication using the Spotify API, allowing users to log in securely with their Spotify credentials.
- Integrated Spotify API to fetch and display user playlists, providing a personalized and familiar interface for users to navigate through their music collections.
- Designed an intuitive user interface with dynamic playback controls like play, pause, skip tracks, and control volume seamlessly.
- Incorporated the Discover Weekly playlist from Spotify, showcasing personalized recommendations based on user preferences.
- Utilized React's Context API to efficiently manage and share the application's state, ensuring smooth data flow between components.

EDUCATION

ABES INSTITUTE OF TECHNOLOGY | B.TECH IN COMPUTER SCIENCE
