ABOUT ME

Dynamic Full Stack Developer with a B.Tech degree and 2 years of experience in developing web applications using React.js, Redux, Node.js, Express.js, and MongoDB. Skilled in AWS services including EC2, Lambda, and S3, with a strong foundation in JavaScript, HTML, and CSS. Expertise in problem-solving, data structures, algorithms, and object-oriented programming. Eager to contribute to innovative projects and grow within a collaborative, high-performance environment.

WORK EXPERIENCE

Jr. Software Developer

PrivateCourt / Delhi / Jul 2023 - Present

- Developed full-stack applications using the MERN stack (MongoDB, Express, React, Node.js), with a custom database and login module integrated with third-party APIs (PAN, GST, Aadhaar, Bank).

- Built and maintained calling modules and IVR systems using TeleCmi services, and integrated Brevo for email and BulkSMS for SMS communication.

- Designed dynamic front-end applications with React and Redux, and implemented efficient back-end APIs using Node.js and Express.

- Led a team in deploying and scaling cloud infrastructure with AWS services (EC2, Lambda, S3) for improved reliability and performance.

Full Stack Developer

MileStoneOs / Saharanpur / Aug 2022 - Jun 2023

- Worked as a Full Stack Developer at MileStoneOs, developing web applications using React.js, Node.js, and MongoDB.

- Contributed to both front-end and back-end development, ensuring scalable, efficient, and high-performance solutions.

EDUCATION

B.tech

Rajkiya Engineering College, Bijnor
2022
