## PERSONAL PROJECTS

### Food-Ordering

- I made a very simple food ordering app in which you can add or remove an item to cart
- HTML, CSS,JavaScript
- React hooks : useState and useReducer
- Link to GitHub : <https://github.com/coderbharti/Food-Ordering>

### Remainder app

- In this app i build a login and sing up page with firebase authentication after that user can add task which is going to store in firebase realtime database and user and can also delete that task which also going to delete from realtime database
- Html ,CSS,JavaScript ,React.js
- React hooks :- useState ,useReducer ,useCallback
- Link toGitHub :<https://github.com/coderbharti/App>

### Expense tracker

- In this app you can record all your expenditures so you have a clear and detailed understanding of your budge
- Html ,CSS,JavaScript
- React hooks :useState
- Link to GitHub: <https://github.com/coderbharti/Expense-Tracker>

### Login -Form

- I made a login page in which i add some simple and basic validation
- HTML,CSS,JavaScript
- React hooks : useState , useEffect , useReducer
- Link to GitHub : <https://github.com/coderbharti/Login-Form>
