PROJECTS

Hospital management system

Duration: 4 months

Team size : 4

Technology involved: .net ,css

Database: SQL

Description:

It is an industrial project done by me and team during last semester. A hospital management system is computer or web based system that facilitates managing the functioning of the hospital or any medical setup . This system or software will help in making the whole functioning paperless.It integrate all the information regarding patient, doctor, staff, hospital administrative details etc. Into one software. It has section for various professional that make up a hospital.
