Summary

Skilled MERN Stack Developer delivering scalable web applications, optimizing backend performance, integrating APIs, and creating user-centric solutions.

Experience

Full Stack Developer, Mobiloitte Technologies – New delhi, India Feb 2024 – Present

- Built and maintained over 5+ full-stack web applications using JavaScript, React, Node.js, Express, and MongoDB.
- Designed and optimized responsive front-end interfaces, ensuring cross-browser compatibility and a 30% increase in user engagement.
- Developed and integrated RESTful APIs, improving data transfer efficiency by 40% between front-end and back-end systems.
- Integrated Stripe payment gateways for secure and efficient online transactions.
- Managed databases, performed CRUD operations, and optimized queries, resulting in a 35% boost in application performance.

Skills

Languages: Java, C++ , JavaScript, Python, HTML/CSS

Frameworks & Libraries: Next Js, React Js, Express Js, Node Js, Material UI

Databases: MongoDB, MySQL

Others: REST APIs, Git/Github, DSA, Postman

Projects

GyanBatua.AI

- **Backend Development:** Optimized Node.js backend code using **SonarQube analysis** to enhance performance and maintainability.
- **Blockchain Integration:** Implemented and interacted with blockchain systems to ensure secure and efficient transactions.
- **Scalability Performance:** Contributed to scaling the **live project**, resulting in a significant increase in user base by 25%.
- **Real-World Impact:** Ensured seamless deployment and functionality for a **growing user base**, showcasing strong technical and problem-solving skills.

Recruiting Platform

- **End-to-End Development:** Designed and developed the project from scratch, working on both frontend and backend. Focused on creating the Job Seeker workflow.
- **Authentication and Job Search:** Built a robust **authentication system** and implemented a personalized job search feature that recommends jobs based on user details.
- **OpenAI Integration:** Enhanced user experience by integrating **OpenAI** for automated profile creation and resume detail extraction.
- **Notification System:** Developed a **real-time notification system** to alert job seekers of new job postings and updates.
- **Help Ticket Flow:** Designed a user support system to manage and resolve job seeker queries efficiently.

Teddy Tale

- **Payment Integration:** Integrated a seamless payment flow using **Stripe**, ensuring secure and efficient transactions.
- **Transaction Management:** Developed **APIs** to store and manage transaction data in the database, enabling real-time tracking and reporting.
- **Responsive UI Development:** Designed and implemented a user-friendly, responsive interface to enhance user experience across devices.
- **Authentication System:** Built a full **authentication flow**, including user registration, login, and secure session management.
- **Performance Optimization:** **Optimized database queries** and API calls to improve the efficiency and speed of the payment flow.

Education

Hindustan College of Science and Technology, B.tech in computer science

2020 – 2024

- CGPA : 7.5
- **Coursework:** Object Oriented Programming, Database Management System, Operating System
