Education

Rajkiya Engineering College Sonbhadra   2020 − 2024
Bachelor of Technology in Electrical Engineering   *CGPA-7.0*

Experience

SpriteEra IT Solution Pvt. Ltd.   January 2024 - June 2024
Software Developer Intern

- Designed and developed responsive, user-centric web applications with a mobile-first approach, ensuring seamless functionality and optimal user experience across a wide range of devices.
- Utilized HTML5, CSS3, JavaScript, and framework like React to deliver high-quality, interactive, and accessible interfaces that meet modern web development standards
- During my 6 months internship, I gained valuable insights into teamwork dynamics and acquired essential skills in team leadership.

Projects

HOSPITAL-MANAGEMENT-APP | *ReactJS, MongoDB, NodeJS, ExpressJS* | 🔗 | ⭘

- Developing a comprehensive Hospital Management System (HMS) using the MERN stack to streamline administrative and medical processes within a healthcare environment.
- Developed the server-side logic using Node.js and Express.js, including RESTful APIs for data handling and business logic and MongoDB for a flexible, document-oriented database structure to manage patient records.
- Features authentication authorization, working with multiple json web tokens, dual frontends (user and admin), and scalable architecture.
- Employs CSS for styling, offering a utility-first CSS framework for rapid and flexible styling of components.

Eats-Easy | *React, JavaScript, CSS,Redux-toolkit ,Routing* | 🔗 | ⭘

- Utilized Swiggy's API to dynamically fetch and display restaurant details and menus, ensuring up-to-date and comprehensive information, contributing to a dynamic and engaging user interface
- Implemented features for users to effortlessly browse and filter restaurants based on cuisine preferences, enhancing the overall user experience.
- Implemented an "Add to Cart" system in the Eats Easy Food ordering app, for an efficient User experience.

MERN-Authentication | *React js, Node js, Express js,Mongo DB,Jwt,Nodemailer,bcrypt js* | 🔗 | ⭘

- Developed a robust authentication system utilizing the MERN stack, incorporating NodeMailer for email notifications and bcrypt for secure password hashing. This full-stack application facilitates user registration, login, password reset, and account verification, ensuring security and user convenience.
- Enabled users to reset their passwords via email, sending a unique, time-limited reset link using NodeMailer
- Ensured all sensitive data, including passwords and tokens, is encrypted using bcryptjs and JSON WEB TOKENS..

Technical Skills

Languages: Javascript, C++
FrameWorks/Libraries:React , Redux-toolkit ,Material UI, Node.js, Express.js, Tailwind css
Technologies/Frameworks: Data Structures and Algorithms, Object-Oriented Programming.MongoDB
Developer Tools:VS Code, Git, GitHub,Netlify,Postman
Area of Interest: Frontend Development, Full Stack Web Development, SoftWare Development

Leadership / Extracurricular

- Head of dance cult, fostering community engagement and enhancing the vibrant cultural fabric of the college.
- Lead college cricket team as captain, demonstrating strong leadership, strategic thinking, and teamwork skills.

Achievements

- 4 stars on HACKERRANK.
- 2 stars on CODECHEF. | 🔗
- Secured Global rank of 884 among 30000+ participants in Starters-106 on CODECHEF
- C++ Developer problem solver certified by Physics Wallah
- Solved 350+ questions on various coding problems(LEETCODE,GFG,CODECHEF).   🔗
