## Projects: -

### Project 1: Helply

**Description:** Helply is an app where customers can get hold of qualified craftsmen when needed most. In Helply's platform, you can find different types of craftsmen, where we are constantly expanding our service areas. The Helply app is also used by workers who perform the jobs requested from customers on the platform. We offer direct contact between the customer and the competent craftsman.

Technical skills: Reactjs, Routing, Redux, Rest API's integration.

### Project 2: HHR

**Description:** HHR is the software for reservation/booking systems for restaurants and cafés. The system is flexible and configurable in many different ways, depending on the unique needs and requirements of your restaurant or café. Users can book restaurants for private parties/Events.

Technical skills: Reactjs, Routing, Redux, Rest API's integration.

### Project 3: Valiant

**Description:** The Online Doctor's Appointment Mobile Application can be used to achieve an appointment with a specialist doctor from a specific stream at a particular time. The application allows users to interact with doctors. Using the app, doctors can get their patients' appointments and diagnoses, as well as their patient directory.

Technical skills: Reactjs, Routing and UI design.
