## SUMMARY

Results-driven .NET Backend Developer with over 1.5+ years of experience in software design and development. Proficient in ASP.NET MVC and adept at crafting robust backend web applications. Demonstrated ability to troubleshoot and debug code, leading to timely project launches. Adept at employing technology to architect sophisticated business solutions with strong analytical and programming skills.

## EXPERIENCE

### Successive Digital 01/2022 - 09/2023

#### GULF HR

This project is based on an HRMS tool, wherein multiple companies can onboard onto the portal and purchase their subscription plans accordingly. Subsequently, users within each company can utilize the portal as an HRMS, with roles such as super admin, admin, and employees, among others.

- Worked from scratch on this project using the .Net 6 framework.
- Responsible for writing the backend API's
- Managing the database through Entity Framework
- Set a benchmark for code quality by crafting comprehensive unit test cases exceeding an 80% threshold.
- Thrived within an agile team of adept .NET developers, fueling rapid software development cycles.

#### Paya Citizen Portal

**Citizen notifications:** Utilities can share real-time payment or service-related notifications (e.g., late payment notices or leak detection alerts) to residents in the portal, creating a new way to inform and engage.

**Multilingual capabilities:** Users can set the desired language with one click. All languages are available with custom integrations.

**Group multiple accounts:** Multi-property owners can access all account billings in one portal. **Streamlined autopay:** The new UI removes friction from the autopay enrollment process, which improves the citizen experience and drives higher adoption rates.

- Write Aws Lambda for executing code.
- Write SQS listener to trigger email and additional requirements.
- Managing database through entity framework.
- Managed user through AWS Cognito.
- Developed web APIs.
- Wrote unit test cases with a threshold of 80%.
- Worked in an agile team of .NET developers for a fast-paced software development firm.

## SKILLS

### Client-Side

C#	ASP .Net	Entity FrameWork	Web API	Sql Server	Git	Source Tree	Jenkins	HTML
CSS	JavaScript	Core Java	XUnit					

## EDUCATION

### Bachelor in Technology in Computer Science

#### KCC Institute of Technology and Management (AKTU)

2018 - 2022 Noida, India

### Senior Secondary (PCM)

#### Bharatiya Vidya Bhavan Delhi

2018 Delhi, India

### High School

#### Bharatiya Vidya Bhavan Delhi

2016 Delhi, India

## TRAINING / CERTIFICATION

---

Certification in Java.

Certification in Computer System Security.

Certification in Enhancing Soft Skills and Personality from NPTEL.

---

Certification in Developing Soft Skills and Personality from NPTEL.

Training in Dot Net Core.

Training in C#.
