Web Development Skills	Html, Css, Javascript, Bootstrap, React.js, PHP, MYSQL , Nodejs , GO Lang
Programming Language	C , C++ , Java

PROJECTS

FOOD DELIVERY APP: Developed a Online food Ordering site with user authentication using MERN stack which provides a interactive and user friendly interface,basically this site is developed with an idea to manage a small restaurant business.

ONLINE VOTING SYSTEM: Developed a secure and user-friendly Online Voting System using PHP, HTML, CSS, and MySQL, ensuring transparent and trustworthy elections for both electoral parties and candidates.

MUSIC LISTER API: The Music Lister Backend API, built with Go, allows users to create, manage, and enjoy music playlists. It offers features such as user registration, playlist creation, and song management while ensuring security and reliability..

EXPERIENCE

Oasis Infobyte July 2023 - August 2023

- As a frontend developer, I crafted engaging Yoga landing page , Portfolio Website that captivated users and provided an immersive web experience. Technology : HTML ,CSS , JAVASCRIPT

CODESoft July 2023 - August 2023

- Utilizing Figma as a UI/UX designer, I orchestrated the design of a restaurant menu, crafted email templates, and orchestrated the signup flow for a mobile app.

ACHIEVEMENTS

- Secured a top 10 spot out of 100 college teams in "Kavach" All India Level Hackathon,representing "Dark Web Crawler" an approach to solve dark web threats .
- Accomplished the resolution of 400+ questions on GeeksforGeeks, attesting to my adept problem-solving skills and programming proficiency.
- Engaged in sports with victories in volleyball, coupled with consistent participation in Kho Kho and Discus Throw throughout my college tenure.
- Managed diverse "BeingUs" YouTube, 150+ subs, impactful Instagram (20K+ views) for insightful campus content.
