

SUMMARY

Having in-depth knowledge of Python, JavaScript opens up a wide range of possibilities for developing web applications, data analysis tools, and Robotic process automation (RPA) skilled in developing, optimizing, and reworking systems to meet specific customer requirements and more.

SKILLS

- Python, Django, JavaScript, DBMS, MySQL, Magento
- Web Dev – HTML, CSS, jQuery, React JS, Adobe XD, Figma
- RPA - UiPath, Anywhere, Orchestrator & Workflow Automation, AWS

EDUCATION

MASTER OF COMPUTER APPLICATION (MCA)

AMC ENGINEERING COLLEGE BENGALURU

Jul 2018 -Sep 2021

BACHELOR OF SCIENCE (BSC)

MAHATMA JYOTIBA PHULE ROHILKHAND UNIVERSITY

Jul 2013 -Jun 2016

CLASS X, XII | UP BOARD

Grad. 2013

EXPERIENCE

Software Developer

Transform Solutions Aug 2022 - Present

- Experience in Robotic Process Automation (UiPath & Anywhere).
- Worked in the integration team to provide various automation solutions for Manual/Runbook-based tasks taken by PEs (L1, L2) by using the following: RPA (UiPath v1.0, Automation Anywhere)
- Engaged in: Full end-to-end automation for VMs architecture, encompassing workflow orchestration tasks.
- Develop & deploy standalone custom infrastructure automation scripts in the following scripting languages like Python2x/3x, Windows, Storage, Backup, DB, and Network Systems. Implemented new website including back-end database storage system and dynamic web pages.
- Developed using CSS, HTML, jQuery, and JavaScript to enhance function Clarity & user experience on web pages. Developing front end and back end of e-commerce, dynamic website, and deliver.
- Participate in project meetings for workflow process design and process automation reviews.
- Responsible for: Building/configuring Magento 1x & 2x sites & web apps. Custom module development for E-Commerce (Magento, others) with ERP integration. Extension customization, testing, and performance optimization

Software Engineer

PointCross.com, Pvt Ltd. Bengaluru Feb 2022 -Jul 2022

- Develop sales in the Life sciences industry with big data analytics, visualization, and warehousing solutions. Support the design and implementation of functional requirements | Work on Python script and Django, libraries including Matplotlib, NumPy, Pandas, Hadoop, etc.
- Developed and conducted usability tests, implementing enhancements to improve experience.
- Modified Database schema to fit in new features in Oracle, MS SQL, DB2, and MySQL databases. Experience in working with version control tools like SVN, GIT, etc.
- Participated in weekly company/client meetings to discuss present projects and strategies on how to produce efficient work.

Software Developer Interns

Tangent ProBiz, Bangalore Mar 2021 -Jul 2021

- Work with product management and technology team to understand business needs and find a possible solution.
- Build back-end features in Django, including profiling and integrating large datasets, and design structures.
- Developed and implemented web applications into Sitecore systems using SCRUM Agile methods.
- Generate user interfaces for compatibility with display formats as per requests and client-provided parameters.

PROJECTS

CivicSource

Software Developer Feb 2023 -Ongoing

- Worked in the integration team to Build and provide various automation solutions for Manual/Runbook which CivicSource offers as an online Auction platform.
- Adept in Runbook Robotic Automation Solution using various orchestration workflow tools like iConclude & HRS, Solution Design, Coding, Testing, Debugging, documentation, and writing complex formulas using UiPath & OpenBots Platform tools, to manipulate data, calculate values, and implement custom business logic.

Enterprise groupware computing solution with engagement

Software Developer Aug 2022 – Jan 2023

- Develop the environment with the team for collaborative company people to share ideas and views in an online workspace, in which they use e-mail, newsgroup and mailing list, chat system, Internet web browsers, and desktop applications in order to share knowledge.
- Development environment: Python, PIP, Anaconda, Django/Flask SharePoint Web Framework including profiling and integrating large datasets, and design structures.

XBIOM Data-Driven Solutions Platform (<https://pointcrosslifesciences.com/xbiom-platform/>)

Software Engineer Feb 2022 – Jul 2022

- Xbiom Clinical & Nonclinical Insights for study data
- XBIOM™ is robust, proven platform for data, information gathering, organizing, searching, and building knowledge. metadata and providing workflow, decision support tools, collaboration, and publishing all in an encrypted secure, role-based, scalable cloud-based facility.

CERTIFICATION

- **Complete JavaScript & jQuery course with Bonus Vue Js Intro Udemy Institution.** 2021-07-08
- **UiPath Certified RPA Associate (UIRPA)** 2023-01-23

SOFT SKILL

- Strong oral and written communication skills, a customer-centric approach to understanding and address business needs effectively.
- Critical thinking prowess, precise information analysis, proficient decision-making abilities.
