## Summary

---

As a skilled Software Developer, I bring good experience in working with Node.js, specifically with frameworks like Express and Nest.js, as well as good command in Angular for front-end development. Additionally, I possess a strong background in both SQL and NoSQL databases, with expertise in PostgreSQL and MongoDB. My abilities extend to designing efficient data schemas and writing complex queries to ensure optimal data management. Committed to delivering high-quality code, I continually stay abreast of the latest industry trends and best practices to enhance the overall development process.

- Contributed in successful development of projects, including a laundry marketplace connecting users and earning an annual revenue of 50000\$.
- Collaborated with a team of 4 backend and 3 front end developers, ensuring seamless communication and timely delivery of projects.
- Implemented optimization strategies on the backend that improved application performance by 40%, resulting in a 20% increase in user engagement.
- Having good knowledge of integrating various 3rd party services along with their webhook implementation like stripe(For payment), TaxJar(for tax calculation), Onfleet(for delivery management), Checkr(for background verification), Everee(for doing payouts).
- Experienced in designing and developing micro service architecture for scalable and modular applications.

## Education

---

**Bachelor of Technology (Hons.) in Computer Science and Engineering** [2018-2022] — **8.96 CGPA** IMS Engineering College Ghaziabad (Dr. A.P.J. Kalam Technical University, Lucknow, Uttar Pradesh)

## Experience

---

### Unthinkable Solutions LLP — Jr. Software Engineer [January 2022 - Present]

- Daily client interactions, gathering requirements and aligning communication between clients and the development team.
- Developed high-quality, back-end with micro service architecture for the web and mobile applications using NodeJs with postgres DB.
- Used Services like Redis, SQS and Kafka for Inter-Service Communication.
- Trained fresher developers on the node js and got them onboarded on the client project.
- Analyzed client requirements and proposed solutions to enhance project outcomes, resulting in a 15% improvement in project efficiency.
- Collaborated with frontend developers and project managers to plan and estimate backend development tasks, ensuring timely project delivery.
- Identified and resolved backend-related bugs and issues through thorough testing, debugging, and timely fixes, resulting in a 40% decrease in user-reported issues.
- Actively pursued continuous learning and professional development, staying updated with the latest web technologies and frameworks.

## Skills Summary

---

- **Tech Languages:** JavaScript[experienced], Java and Python
- **Backend Development:** NodeJs(Express and NestJs)[experienced]
- **Angular:** Components, directive, modules pipes and life cycle hooks[experienced].
- **Google APIs:** Distance Matrix
- **Version Control:** Git
- **Workflow Management Tools:** JIRA, Trello

## Projects

---

### Laundry Market Place:

- Contributed in the development(From Scratch to End) of a tech-enabled marketplace connecting users and service providers.
- Generated an annual revenue of \$500,000 by facilitating laundry services through the platform.
- Collaborated with a team of 10 developers to create an admin and customer application.
- Implemented back-end functionality using NodeJS, Postgres and Redis.
- Ensured secure payment transactions keeping every critical process through the backend.
- Integrated Services like Stripe, TaxJar, Onfleet, Everee and Checkr.

### Government Service Portal:

- Developed various UI for admin portal Using Angular.
- Designed Database schema for a complete module.
- Developed complete front end and backend for the module.

## Achievements

---

- Recognized internally in the organization for outstanding contributions to the team/project.
- Received recognition and reward (RnR) for exceptional performance in the project from the client.
- Achieved and maintained a prestigious five-star rating from the clients in all the projects.
- Successfully completed a wide range of challenging coding problems with high accuracy and efficiency
