EDUCATION

Dr. APJ Abdul Kalam Technical University — **73.5%**
Bachelor of Computer Science and Engineering — *Aug. 2019 – july 2023*

SS Public School — **61%**
12 — *March. 2018 – May 2019*

DAV Public School — **81.7%**
10 — *March. 2015 – May 2016*

EXPERIENCE

MERN Training & Development — June 2023 – Present
Croma Campus Training and Development — *Noida, IN*
- Learning and training on MERN Technology
- Developing a full-stack web application on MERN Technology
- In the ongoing Traning I get to work on two live Project

AI Image Generator GANs — Aug 2022 – July 2023
IMS Engineering College — *Ghaziabad, IN*
- GANs are used in many real-world applications. it is used in the generation of images, generating high-resolution images *STYLE GANs, cycleGANs, SRGANs, ESRGANs*
- Generator and discriminator use in the GANs in the generation of image
- Conducted on various images to get the high-resolution, human photograph to look like an image but it won't be real
- Presented Physically to the *IRAJ-INSTITUTE OF RESEARCH AND JOURNALS*

PROJECTS

Car Showcase Website | *HTML, CSS, JavaScript ReactJs, Tailwind CSS* — June 2022 – August 2022
- Designed and developed a responsive and dynamic website using HTML, CSS, and JavaScript, with a focus on user-centric design and performance optimization, resulting in a seamless user experience.
- Leveraged the power of RapidAPI to seamlessly integrate third-party APIs, enabling real-time data retrieval and enhancing the website's functionality by incorporating external services and data sources.
- Integrated React.js to create interactive and efficient user interfaces, enhancing the website's interactivity and responsiveness.

Shopping Website | *HTML, JavaScript, CSS, BootStrap, JavaScript, React, NodeJs* — july 2023 – July 2023
- Developed a responsive and user-friendly e-commerce website using HTML, CSS, and JavaScript to ensure optimal user experience across various devices and browsers.
- Integrated a secure payment gateway system (e.g., Stripe, PayPal) to enable seamless and secure online transactions, ensuring customer data privacy and payment processing reliability.
- Implemented user authentication and authorization mechanisms to enhance security and provide personalized user experiences.

Payment Gateway | *ReactJs, NodeJs* — August 2023 – August 2023
- Developed and implemented a secure and efficient payment gateway system using React for the front-end and Node.js for the back-end, ensuring seamless and secure online transactions, integration with various payment methods, and robust data encryption to safeguard sensitive customer information.

TECHNICAL SKILLS

Languages: Java, OOPs, Data Structure
Frameworks: ReactJs, JavaScript, BootStrap
Web Designing: HTML5, CSS, JavaScript, BootStrap, JQuery, NodeJs
Database: Mysql, MongoDB
Developer Tools: Git, Visual Studio, PyCharm, IntelliJ, Eclipse
