## CAREER OBJECTIVE

Seeking a competitive and challenging position in the field of **Software Testing** and **Quality assurance** to ensure the delivery of high-quality product. Leveraging my experience in software test case development and execution, test plan implementation, and analyzing to identify defects and improve product performance. I have an urge and inclination for learning new technologies, a strong work ethic combined with a commitment to excellence in all projects undertaken.

## PROFESSIONAL SUMMARY

- **Test Analyst** with 8 + Years of Functional Testing experience in CMMI level 5 companies (including 2 years of experience in **Performance Testing Load Runner**).
- Strong hands-on experience in Agile/Scrum model.
- Working experience in testing **RESTAPI** using **POSTMAN**.
- Strong understanding in **Daily Scrum, Sprint planning, Sprint review, Sprint retrospective, Backlog refinement**.
- Having vast experience in **Test Estimation, Test Planning, Test Strategy**, Test Designing & Execution, Project delivery.
- Testing Methodologies: Black box testing like Functional Testing (**Smoke, Sanity, Regression, Retesting Integration and System Testing**).
- Good Understanding of "Test Design Techniques" like Equivalence Partitioning, Boundary Value Analysis etc. as per the SRS.
- Maintain Traceability Matrix (Requirement Traceability Matrix) during **STLC**.
- Good understanding of Defect Tracking and Defect Life Cycle.
- Experience in bug tracking tools **JIRA**, Octane and Application Lifecycle Management (**ALM**)
- Preparation of Test Report as per the Test Execution Status and provide other metrics to management as needed.
- Strong communication and interpersonal skills with expertise of interacting with Onshore Scrum Master, Product Managers.
- Work with the project team to estimate User Stories and define the scope for testing. Create the corresponding test strategies, test plans, and test cases as needed.
- Strong analytical and communication skills and proven experience of having worked with BAs and developers.
- Identify problem areas and suggest improvements to increase resource efficiency and productivity.
- Hands on experience in writing SQL queries.
- Good understanding in developing **Vugen Scripts**.
- Good with debugging, Identifying, Adjusting, and fixing script errors by running it within Vugen.
- Executed the test performance script using **Load runner** and **analyze the results**.
- Excellent with **parameterization** and **correlation**.
- Experience with **baseline, benchmark, load, stress and endurance** testing for performance.

## TECHNICAL SKILLS:

- **API Testing Tool** : Postman
- **Performance Testing Tool** : LoadRunner
- **Testing Tools** : HP ALM, JIRA, WinSCP, Putty, ADO, OCTANE, VersionOne, Linux
- **Database** : MYSQL
- **Others** : Manual Testing, Performance Testing

## CERTIFICATION & ACHIEVEMENTS

- ISTQB Foundation (2015)
- Star of the month Award (2016)
- Change maker Award (2019)
- Customer Choice Award (2022)
- Pat On the Back Award (2020)

## CAREER SUMMARY

**Current Organization: Coforge Ltd., Greater Noida as Test Analyst.**

**Work Experience: 8th Feb 2018 to till Present.**

### Project Walkthrough

<b>Title</b>	<b>GSL Certification</b>
