Career Summary

Software Developer with expertise in React.js, JavaScript, and delivering over 2 high-quality web applications. Proficient in translating client requirements into effective technical solutions, ensuring code integrity and reducing post-release bugs by 30%.

Employment History

Software Developer, Hebbale Academy, Bengaluru

04/2021

- Developed and maintained applications employing React, JavaScript, TypeScript, HTML, and CSS.
- Designed and implemented AppCensus admin UI and Appcensus App testing applications using React, JavaScript, TypeScript, HTML, and CSS, resulting in a streamlined user experience and a 20% reduction in app-related issues.
- Boosted application performance by 25% through strategic code refactoring and optimization of database queries.
- Collaborated closely with clients, ensuring thorough understanding of requirements and delivering prompt technical support.
- Enforced coding, testing, and debugging best practices, leading to a 30% reduction in system bugs and enhancing overall performance and maintainability.
- Utilized Restful web services to enhance user experience for the BemyGuest application, resulting in a 40% increase in user engagement.
- Demonstrated adeptness in JavaScript, CSS, HTML, DOM manipulation, and JavaScript object model, contributing to 10% faster page load times and improved user interactions.
- Leveraged previous React.js developer experience, utilizing tools such as React.js and Redux, and applying familiarity with EcmaScript and ES6 specifications to drive a 15% increase in development efficiency.
- Successfully integrated APIs on cloud platforms AWS and Google Cloud (GCP), improving application scalability by 30%.

Education

Bachelor of Technology, Anand Engineering College, Agra

08/2010 - 06/2014

I have completed my B.Tech with Hons.

Projects

BemyGuest Application

01/2023 - 08/2023

- Crafted an immersive accommodation app focused on experiential learning, offering hands-on exposure to real-world industry projects for coding education.
- Generated new features end to end, focusing on UI perspective. Created reusable and maintainable components with unit testing leading to a 40 % reduction in UI-related bugs. Also collaborated across teams to meet project deadlines.
- Executed comprehensive code reviews, contributing to a 20% increase in overall code quality and 15% reduction in post-release bugs.
- Tools & Technology: React, Typescript, HTML, CSS, Redux, React-Router, Docker, Python, Django Framework, Sass, AWS Cloud Services.

AppCensus Admin UI

10/2022 - 01/2023

Admin UI for AppCensus, Enabling admin management of mobile app analysis.

- Invented org-apps features,, which allowed users to manage and organize applications within organizations, leading to a 40% improvement in user engagement with organizational features.
- Cooperated with cross-functional teams, organised code reviews resulting in an average 25% decrease in bug density and provided technical support to clients.
- Collaborated with backend developers to troubleshoot and resolve 20+ technical issues, maintaining an average response time of under 4 hours and ensuring a 98% issue resolution rate.
- Tools & Technology: React, React-Router, Redux, Docker, Typescript, Git, Jira, Bitbucket, PostgreSQL, Playwright, AWS, MaterialUi.

AppCensus app testing App

04/2021 - 10/2022

Automation of mobile app analysis for AppCensus.

- Collaborated with 2 cross-functional teams to review and enhance code quality, resulting in a 20% reduction in code errors and an average 15% increase in application stability.
- Supported key clients in understanding and meeting their technical requirements, leading to a 90% client satisfaction rate.
- Assisted in automation of the app and creating reports and reduced manual effort by 40 hours per week, boosting team productivity
- Implemented comprehensive unit test suite, leading to a 30% improvement in software quality as evidenced by a significant decrease in critical bugs reported by QA.
- Tools & Technology: React, React-Router, Typescript, HTML, CSS, Redux, Docker, Git, Jira, Bitbucket, PostgreSQL, Playwright, AWS, MaterialUi.
