GOKUL JOSHI

Mobile: 9971962961 | E-Mail: gokuljoshi86@gmail.com | www.linkedin.com/in/gokul-joshi-39306232

PROFESSIONAL SUMMARY

Engineering Manager and Architect with over 15 years of experience in leading Platform and Product Engineering, Cloud, and Microservices strategy, alongside Performance Engineering, Technical Consulting, and Delivery Management. Proven track record in developing and executing end-to-end technical solutions for industries such as Payments, Finance, HR, and Healthcare. Expert in designing scalable architectures, optimizing system performance, and guiding teams through complex technical challenges.

Skilled at aligning technology strategies with business goals, translating business needs into actionable technical specifications, and delivering high-quality results under pressure. Exceptional leader with a focus on mentoring diverse teams, fostering innovation, and driving project success. Known for an ability to simplify complex concepts and communicate effectively with both technical and non-technical stakeholders, bridging the gap between technical execution and strategic vision.

PROFESSIONAL EXPERIENCE

Company Name	Designation	From	To	Duration
Atlas Technology Solutions, Inc., Noida	Solution Architect	Dec 2022	Till Date	1 yrs 9 m
Pine Labs, Noida	Engineering Manager	Aug 2015	Dec 2022	7 yrs 4 m
Indus Valley Partners, Noida	Senior Software Engineer	Oct 2011	Aug 2015	3 yrs 9 m
Infosys Technologies Ltd, Hyderabad	Systems Engineer	Nov 2008	Oct 2011	2 yrs 11 m

Key Skill

Team Performance Rating	Client Relations	Streamlining Architecture
Appraisal Rating	Requirements Gathering	Compliance and Governance
Strategy Development	Management and Leadership	Migration/ Implementation
Agile Scrum, Kanban	Data & Integration Architecture	Process Optimization
Stakeholder Management	Technical Documentation	Technical Support/ POC

Technical Skill

.Net Core, C#, React JS	SQL, MongoDB, Elastic Search	Docker, Kubernetes
jQuery, CSS, Java Script	Azure, AWS	TDD, DDD
ASP.Net, Web API, WCF	REST, SOAP APIs	Kafka, Keycloak

Trainings

- Emerging Leaders Program (TPC Leadership)
- Introduction to Agile Development and Scrum (IBM Coursera)
- Security Awareness Training (ISC2 Coursera)
- Technical Training Program in Infosys Technologies Ltd.

Employment Scan

Since Dec'22 with Atlas Technology Solutions Inc., Noida

Title: Atlas Platform	Team Size: 30

Technologies Used: .net Core, Azure SQL, Web API, React JS, Mongo DB, Azure Cloud, Keycloak

Scope : Atlas was built on years of experience navigating the business challenges of quickly deploying and paying international employees, all while ensuring compliance with local regulations. The Atlas enterprise-grade technology platform is uniquely designed to deliver end-to-end EOR and Human Experience Management (HXM) solutions through an empowered user experience. The platform supports thousands of companies and remote teams through localized experience and expertise, providing self-service capabilities and real-time insights that lead to improved business outcomes.

Highlights
⇨ Guide and mentor solution development by leading and coaching teams throughout the entire development lifecycle. Contribute to and validate all design aspects of the solution, providing expert consultancy and coaching to project teams.
⇨ Conduct deep-dive architecture reviews of critical production applications in collaboration with Software Engineering teams. Offer strategic architectural recommendations for both immediate and long-term improvements.
⇨ Develop logical infrastructure solutions that align with technology standards. Collaborate closely with infrastructure teams to ensure that the physical infrastructure meets all project requirements.
⇨ Collaborate with Senior Technical Engineers to ensure that design and implementation align with the proposed architectural definitions. Partner with the performance testing team to confirm that the final solution satisfies all non-functional requirements.
⇨ Engage with Product Owners and Business Teams to drive functional decisions and ensure alignment between business goals and technical execution.

Since Aug'15 with Pine Labs, Noida

Title: Payment Controller	Team Size: 11

Technologies Used : C#, Asp.net, SQL Server, JavaScript, WCF, Web API, CORE WEB API, React JS, Mongo DB, Kafka

Scope : It is a full-stack merchant Platform. It supports all payment modes (credit/ debit card, reward/loyalty points, gift vouchers, etc.) present in the Indian market. Payment Controller UI is a web application used for Merchant On-boarding, EMI/UPI configurations, POS configurations etc. by OPS/Tech support/Customer Care team. API Engine and Background Services are used for Third Party integration and Bulk processing.

Highlights
⇨ Led a team of engineers to demonstrate best engineering practices among developers and testers.
⇨ Responsible for end-to-end delivery using sprint model.
⇨ Responsible for design, development & implementation of project.
⇨ Risk Management to identify fraud transaction
⇨ Handling EMI Vertical for Offline Payment
⇨ UPI Integration, Batch Settlement and E-Charge slip service

Since Oct'11 with Indus Valley Partners, Noida as Senior Software Engineer

Title: QVT Financial Fund LP	Team Size: 8

Scope : QVT Financial LP is a privately owned hedge fund sponsor. The firm provides its services to pooled investment vehicles. It invests in the public equity, public debt, and alternative investment markets across the globe.

Roles and Responsibility:

1) Mordor:
Technologies Used: C#, Asp.net, SQL Server 2008, JavaScript, WCF
This application aims at accounting of investor money, fees and produce NAV statements. The System captures the Subscriptions from investors, Redemptions back to investor, Allocation of Profit and Loss to investors, Side Pocket Accounting, Management and incentive fees calculation and NAV statements. System also captured High Water Mark for investors as an effect of different transactions like Subscription, Redemption, Side Pocket Movement etc.

Highlights
⇨ Handled the Investor Relation module.
⇨ Had the responsibility of investor statement, redemption packets and validation reports.
⇨ Involved in design and coding of booking and reconciliation modules.
⇨ Handled the Swift system used for wire payments.
⇨ Build and monitor different loading and enrichment jobs.

Nov'08 to Oct'11 with Infosys Technologies Ltd., Hyderabad as Systems Engineer

---

Title: HMIS NEXTGEN	Team Size: 40

Technologies : Asp.net, SQL Server 2008, jQuery.
Scope : SCI is North America's largest provider of funeral and cemetery services. This project involved end-to-end development of a **web application**, which would meet the day-to-day business needs of the client. Project was developed on the .Net 3.5 framework. It has service Oriented architecture which allows enterprises to plug in new services or upgrade existing services in a granular fashion to address the new business requirements.

Highlights
⇨ Coded modules using jQuery, ASP.Net and AJAX.
⇨ Created stored procedures, Triggers, and functions in SQL server 2008.
⇨ Distinction of being the youngest member in peer group to deliver screen prototype model to client using new technology.
⇨ Recipient of an award for an excellent work during build phase for exploring and implementing custom functionalities.
