PROJECTS

FitGuysWeb (Backend) — *Java, Spring Boot, Spring Security, Spring DI, MySQL, JWT, REST API*
Live Demo GitHub

- Engineered the backend for a fitness web application, enabling user registration, login, and workout tracking.
- Designed and deployed robust RESTful APIs to authenticate users, manage workout plans.
- Integrated JWT-based authentication, enhancing security for user sessions and safeguarding sensitive data.

REST API for E-Commerce — *Java, Spring Boot, Spring DI, Spring Data JPA, REST API*   GitHub

- Developed a scalable RESTful API for an e-commerce platform using Java, Spring Boot, Spring Data JPA, and Spring DI.
- Implemented core functionalities for managing products,orders, and customer accounts, driving smooth e-commerce operations.
- Emphasized modular architecture by leveraging Spring DI, resulting in an easily extensible and maintainable codebase.

Moviefy — *React, Axios, Tailwind CSS, React Router, TMDB API*
Live Demo GitHub

- Developed a responsive web application for discovering trending movies and TV shows using the TMDB API, enabling users to browse, and save titles to a personalized watchlist.
- Implemented search functionality to filter results by title and a watchlist feature using localStorage for data persistence.
- Designed a user-friendly interface with interactive cards, hover effects, and dynamic like buttons.
