Harish Nishad

S O F T W A R E E N G I N E E R

SUMMARY

As a skill Mern Stack application developer I possess an understanding of web development, including a skill in comprehending client requirements and delivering projects while adhering to the software development life-cycle. My collaborative approach has enabled me to work effectively with team members to produce visually stunning, user-friendly, and scalable applications.

KEY SKILLS

HTML • CSS • JavaScript
Bootstrap • Angular • React • Redux
Redux Toolkit • Express.js
TypeScript • Nodejs • MySQL • Sequelize
Mongodb • Mongoose
Data Structure and Algorithm
Operating Systems
DataBases Management System
System Design
swagger • Postman • Git
Jenkinst • PM2 • fileZilla
Leadership Skills

CERTIFICATIONS

- Operating Systems | Coding Ninjas | Issued Mar 2024
- DataBases Management System | Coding Ninjas | Issued Mar 2024
- System Design | Coding Ninjas | Issued Jun 2024
- Back End | Triplebyte Certified Triplebyte | Issued Apr 2022
- Front End Development with React Coding Ninjas | Issued May 21
- Back End | Full Stack Web Development in Node.js Coding Ninjas | Issued Oct 20
- Front End | Full Stack Web Development Excellence Coding Ninjas | Issued Aug 20

PROFESSIONAL EXPERIENCE

Software Engineer

May '23 - Sep '24

CodeFire Technologies Pvt Ltd | Noida, Uttar Pradesh

Project:

Finhaat : A unique financial services distribution platform to cater to the distinctive needs of financially underserved population.

- I have implemented a claim initiation and approval process at different levels, along with dashboards, permissions, and a claim form master.
- Managing and validating the uploaded user data through Excel, handling large volumes of information.
- Utilized dynamic forms and reusable components to extract additional information from user.
- Developed over 5+ cron job functions to consolidate table calculations into a single, reducing API efforts and improving system efficiency.
- Integrated Redis into dashboards and other components to optimize system performance and reduce redundant API calls
- Technology: JavaScript, React, Redux, Express.js, Nodejs, Sequelize, Aws, MySQL, Pm2, fileZilla, Jenkins.

Responsibilities:

- I developed Finhaat in collaboration with one team member.
- Troubleshoot and resolve technical challenges promptly, ensuring the stability and reliability of the applications
- Provide technical guidance and mentorship to intern developers, promoting best practices in Node.js.
- Create and maintain documentation for the backend architecture and version release notes.
- Handling and coordinating with clients with teams
- Managing demo and dev servers, contributing to a streamlined development.
- Merge and reviews intern code to maintain standards of code quality.

Junior Nodejs Developer

Jun '22 - Apr '23

PrimaFelicitas | Noida, Uttar Pradesh

Clojbug: ClojBug is a modern test management platform for manual testing, tracking, and reporting that helps deliver higher quality software.

- Developed a collaborative web application for test case management and report generation. Implemented analytics features using historical data.

Aaware: Aware™ unites a physical tracer with public blockchain technology for trusted traceability.

- Involved in the development of Aware™, I contribute to integrating a physical tracer and other. My responsibilities encompass both front-end and back-end of the project
- I have created over 30+ REST APIs and added validation for user input data on front-end and back-end.
- Implement an Action Log and Change Log in the system to simplify debugging and improve system transparency.
- I have implemented QR code to monitor status along with relevant information.
- Technology: JavaScript, Angular, React, Redux, Express.js, Nodejs, MongoDB, Google Maps API

INTERNSHIP

Intern Software Engineer

Nov '21 - Mar '22

Doceree | Kalkaji, New Delhi

Software Development & Testing

- Gained hands-on experience in the development of a new application using MEAN Stack.

- Java | Data Structures andAlgo
- Coding Ninjas | Issued Feb 19
-

- Identified and resolved software bugs to ensure seamless functionality.
 - Acquired knowledge of development methodologies.
 - Technology: Html, CSS, JavaScript,Bootstrap,Angular,Express.js,Nodejs,MongoDB
-

EDUCATION

Master's in Computer Applications Jul '23 - Present

IGNOU | Delhi,In

Course modules:

- Logic System Design | Data Structures | Probability and Statistics | Data Base Management System
 - Computer Architecture | The Fundamental of Computer Network , Digital Marketing| Programming
-

Master's in Computer Applications Jul '23 - Present

IGNOU | Delhi,In

• Course modules:

- o Design and Analysis of Algorithms | Discrete Mathematics |Security and Cyber Laws | Professional Skills and Ethics,
 - o Data Communication and Computer Networks | Computer Networks and Data Mining Cloud Computing and IoT | Cloud and Data Science
-
