## WORK EXPERIENCE

02/2024 to  
Current

### Assistant Manager (Software Developer)

Adani Digital Labs - Gurugram, India

- Designed and implemented dropout case detection (e.g., cart abandonment, payment failures) with PostgreSQL leading to **8-10% increase in Business Revenue** by recovering lost transactions reasons. [[Link](#)]
- Built the entire flow for Lounge search functionality, including modules, services, and dependency injection which contributes to almost **10% of overall business**.
- Developed APIs for order tracking and invoice download, enhancing **support efficiency by 25%**. Integrated third-party APIs using NestJS and TypeScript.
- Implemented notification system supporting refund messages to users increasing revenue by **9%**.
- Decreased API response latency by **70-80% through optimized module** queries and system design principles.
- Increased **system reliability by 40%** by adding comprehensive exception handling logic in Bill Payment Module. [[Link](#)]
- **Reduced notification delays by 60%** with UPMS integration across platforms.
- Developed webhooks for real-time updates from NPCI regarding payment status (success/failure/cancellation).
- Enhanced **user tracking accuracy by 20%** with middleware integration for KreditBee's System in **Lending** which was **Adani One Flagship Product**. Led team of 2 interns.
- **Boosted data security compliance by 100%** through Azure Blob Storage for sensitive documents as Aadhar or PAN.
- **Tech Worked With:** NodeJs, NestJs, PostgreSQL, MongoDB, Docker, Redis, Jenkins, ReactJs, RestAPI Architecture, Microservices

08/2023 to  
02/2024

### Graduate Engineer Trainee

Adani Digital Labs - Gurugram, India

- Built both front-end and back-end dashboards with an admin panel (JWT auth).
- Utilized JavaScript for dynamic alert messages and interactions.
- Implemented comprehensive input validation on both client and server sides.
- Created Duplicate File Detector system for **Adani Electricity** reducing **database cost by 20%**.
- Recognized in **Top 5 contributors** by commit count in GitHub repo of ADL just within 5 months of joining.
- **Tech Worked With:** C#, .NET, HTML, CSS, JavaScript

## SKILLS

- Node.js, Nest.js, MongoDB, React.js, Microservices, RESTful API architecture, Java, JavaScript, Git, Postman, Docker, Redis, PostgreSQL
- C#, .NET, Data Structures & Algorithms, OOPS, Java, Kubernetes, CI/CD pipelines
