PROFESSIONAL SUMMARY

A competent and result-oriented professional with **1.6 year of experience** in **Java with Selenium automation testing** in **Strivenest Technologies** in Hyderabad.I Have a Skilled in designing, developing, and implementing automation testing solutions across diverse technical environment.Adept at building robust test automation frameworks to ensure quality and performance.

- **Core Java**: Proficient in developing and automating test cases using object-oriented programming concepts.
- **Selenium WebDriver**: Skilled in automating web applications for testing across
- multiple browsers and platforms.
- **TestNG**: Expertise in managing and executing test cases with advanced reporting features.
- **Postman**: Experienced in API testing, validating responses, and automating API workflows.
- **Manual Testing**: Strong ability to perform functional, regression, and user acceptance testing.
- **Maven**: Familiar with managing project dependencies and executing builds using Maven automation.
- **MySQL**: Knowledgeable in database management and validation through SQL queries.
- **Trello/Planio/JIRA**: Hands-on experience with these tools for tracking project.
- **Git & GitHub**: Proficient in using version control to manage codebases and collaborate on projects.
- **Eclipse IDE**: Experienced in using Eclipse for Java and Selenium development.

PROFESSIONAL EXPERIENCE

SRIVENEST TECHNOLOGIES PVT LTD

Java with selenium automation engineer   May 2023 – Till now

TECHNICAL SKILLS

Automation Skills:

Expertise in Test Automation for Web applications and REST APIs.
- Experience in working with Selenium WebDriver.
- Experience in working on Page Object Model Design pattern with Hybrid framework.
- Experience in working with Hybrid and BDD (Behavior Driven Development) frameworks.
- Experience on new script development, script execution and script maintenance.
- Experience in Designing and executing the Automation scripts using Selenium Web driver.

Manual Testing Skills:

- I have In-depth knowledge of **SDLC** and **STLC** processes.
- Skilled in generating test cases for various testing levels: **Modular**, **End-to-End**, and **Integration**.
- Experienced in **Regression**, **Functional**, **Integration**, **System**, **Smoke**, and **Sanity Testing**.

TECHNICAL SKILLS

Software development	Agile,Scrum
Skill set	Core java, J2EE
Frameworks	Selinium, TestNG
DB Skills	MY SQL
Web services	PostMan Api Testing
Building Tools	Maven
IDE TOOLS	Ecllipse,IntelliJ
Respository Tools	Git ,GITHUB

ACADEMIC PROFILE

BACHELOR OF Technology (BTECH) CSE	2023	72%

Sri Venkateswara institute of Technology Affiliated to JNTUA University.

INTERMEDIATE (MPC)	2019	84%.

Board of Intermediate Education, Andhra Pradesh

SECONDARY SCHOOL CERTIFICATE (S.S.C)	2017	85%

Board of Secondary Education, Andhra Pradesh.

PROJECT PROFILE (StriveNest Technologies)

#1

Project Details

Title	:	**Passio Driver App & User App Admin Dashboard Testing**
Client	:	**CHARLES SCHWAB**
Role	:	**QA Testing**
Technologies	:	**Java,Selinium,Maven,TestNG,Postman**

Description:

Automated testing for the Passio Driver App and User App Admin Dashboard, covering key modules like Dashboard Analytics, Vendor Management, Product Listings, Taxi Booking, and Fleet Management. Developed and executed test scripts using Selenium WebDriver with Java to validate workflows and dat accuracy. Automated regression tests for functional areas such as Vendor Management, Product Orders, and User Statistics across roles like Admin, Manager, and Driver.

Responsibilities:

- Automated regression testing of major functionalities across multiple user roles.
- Ensured UI responsiveness and accurate data representation in dashboard modules.
- Executed and managed test cases with **TestNG** for better test coverage and reporting.

#2

Project Details:

Project Title : **EazSource Hospital Management System - Admin Dashboard Testing**

Technologies : Selenium WebDriver, TestNG, Jira, Java, Xpath

Description:

Developed automated test scripts to verify the functionality of the admin dashboard for a hospital management system. The dashboard allows administrators to monitor patient data, medical staff, clinics, appointments, and system users..

Responsibilities:

- Created test cases to ensure proper loading of statistics, including total patients, nurses, clinics.
- Automated the validation of UI components and data visualization, like bar graphs displaying doctor, nurse, admin, and clinic counts.
- Utilized TestNG for test case execution and reporting, enabling continuous integration and validation of system updates.

DECLARATION

I hereby declare that the above-mentioned information is correct up to my knowledge and the responsibility for the correctness of the above-mentioned particulars.
